Bikeway Projects

The City of Calgary is working to achieve the targets set out in the Council-approved [📄 Cycling Strategy](#) to become a bike-friendly city by planning, designing and building more [📄 on-street bikeways](#), particularly bike lanes and cycle tracks. Research has shown that properly designed and constructed bikeways can encourage more people to choose cycling as a viable form of transportation by improving safety and comfort.

Funding for bikeway projects comes from the Council-approved [One Calgary Service Plan and Budget](#). Whenever possible, The City implements bikeway improvements with scheduled [road paving](#) to cost-effectively improve the roadway design so it functions better for all users, and install the infrastructure and pavement markings with minimal disruptions.

2024 Repaving Program and On-street Bikeway Overlap

Road	Column1	Ward	Length (km)	Route type	Existing On-Street Facilities
Tuscany Wy NW	between Tuscany Dr NW and Tuscany Dr NW	1	1.3	Existing	None
