Feedback:

Hello, I support this land use re designation because it provides more affordable housing near the downtown core. It also intensifies the population density in an innercity community such as Bankview which is aligned with the municipal development plan. I currently live in Bankview and enjoy being able to either walk or take the train to work. Living close to work is beneficial for both the city and the community residents as we take advantage of the great public transit system and decrease the overall traffic. Thank you, William Mackie

Feedback:

From The Scoville Family: We agree with this land use change, because it brings diversity of housing types in the Bankview community. Other adjacent communities like Richmond have this type of housing but it is almost inexistent in Bankview. More affordable housing in the inner city allows families like mine to live close to work and make our daily commute (In my case walking) fairly easy and quick. I am really hoping for this and many other RCG projects to be approved in this area. Regards, Matthew Scoville Cell: 604-790-9495 Email: matthewscoville95@gmail.com
