THE **COMMUNITY BOARDWORX** PROJECT:

In the fall of 2008 the Community Boardworx Partnership Team launched a collaborative project that united local artists with dozens of youth from Boys and Girls Clubs of Calgary. The goal was to create artwork to enhance a downtown construction site.

PROCESS:

Interested developers work with Urban Youth Worx and a local artist to come up with artistic designs for their construction hoarding boards. The boards are painted by youth from Boys & Girls Clubs of Calgary, working at a B&G club in Renfrew. Once completed, the boards are mounted at the construction site followed by a community celebration.

The Project fosters collaboration between youth, artists, builders, and the Calgary community while also beautifying the city.
