

CALGARY CONSTRUCTION ASSOCIATION

THE VOICE OF THE CONSTRUCTION INDUSTRY

October 10, 2014

The City of Calgary
Traffic Engineering, ROADS

Attn: Chris Hewitt, Business Strategist, Traffic Strategy

Re: Sidewalk Closures Update Technical Report

This letter is to confirm the Calgary Construction Association supports the Sidewalk Closures Update Technical Report, of October 10, 2014.

The members of the Calgary Construction Association are ICI contractors who perform the commercial construction projects in Calgary. Many construction projects require the closure, hoarding and detour of sidewalks for the protection of public safety.

In order to maintain safe accommodation of pedestrians during construction activity the Calgary Construction Association is committed to working collaboratively with The City of Calgary Roads, Planning Development and Assessment through monthly joint Construction On-Site Safety Committee meetings and to utilize the "On-Site Construction Safety -Best Practices."

Yours truly,
Calgary Construction Association
