**RE:**  
Community Outreach for Planning - PUD2019-0839 - September 4, 2019

Dear members of the Planning and Urban Development Committee,

On behalf of CivicWorks, I am reaching out to you regarding the Community Outreach for Planning Project that will be presented for information on September 4. Over the past year CivicWorks has attended a number of stakeholder workshops as industry participants, keen to support and contribute to Community Planning's goal of creating a more predictable, best-practice approach to community outreach on development applications and local policy plans.

CivicWorks commends the work undertaken, tools and resources created, and process that fostered great discussion among community, industry, and City Administration. The leadership team was tasked with a challenging objective; from project planning and engagement, to the creation and implementation of the Toolkit, we give praise on a job well done. The ultimate deliverable, the Community Outreach on Planning and Development online toolkit, provides a valuable resource for all actors involved, establishing a common baseline understanding and predictable outreach approach.

Sincerely,

A handwritten signature in black ink, appearing to read "David White".
