CITY OF CALGARY
RECEIVED
IN COUNCIL CHAMBER

Petition to the Calgary City Council

COUNCIL CASSONY
CITY CLERK'S DEPARTMENT

We, Taxi Driver's representing Calgary Cab Drivers Society, petition's to the City Council of Calgary to consider our viewpoints before changing Dr. Hara's formula – (TPL ratio to population) for issuing Taxi Plates being proposed by LTS.

We are very much sure that we do not need any more taxis, but we can improve situation by focusing on improving the dispatch system.

The reasons we think so because:

- 1. Oligopoly of Big Broker companies: There are just two broker's holding 90% of the market. Cab operators are left with little or No choice but to work with these brokers plus they hold more than 50% of the TPL's registered under their name and can twist the facts in their favor. Cab owners pay 10-12% interest charges for financing their cabs, No one will pay such an high interest if one does have little savings or has other options.
- 2. Earning Hours are just 31.11% of working time: As per study conducted by the Livery Transport drivers earning Hours are just 31.11% of the working hours. Rest of the time they are waiting for the fare at the stands or going around looking for the fare. With the change in Dr. Hara's formula excessive cab will be added to the existing fleet. This will bring down the cab operators income drastically, who are already toiling hard to make both ends meet. They have reached the starvation point.
- 3. Improve the Dispatch System: The customer's complain about the busy phone signals. Brokers make million per month, they can hire more call takers to answer the calls during the busy time. Same time cab operator is waiting for a dispatched call and customer is waiting for his call to go through. This is the reason waiting time for a tare for a cab operator is close to 70%
- 4. Big difference in situation of passenger transportation industries from past like:
 - 4.1. 1526 total cabs in Calgary.
 - 4.2. Approximately 500 Cars to Go in Calgary.
 - 4.3. Shuttle Service at hotels and dealerships etc.
 - 4.4. Almost 400 Limo's and Sedan's in Calgary.
 - 4.5. Lot of addition in City Bus & LRT service in Calgary. (Bus 300 gcing to Airport from Downtown)
 - 4.6. More Rental Car companies in Calgary.
- 5. Parking Problem: As we know during slow hours of the day every taxi driver rush to Downtown because there is very less business in any other part of cty. More taxies over road means very harsh competition to get spot over taxi stands because of very less parking

- available for taxis in downtown. There are parking restrictions during peak hours and cabs keeps going round and round looking for a flag. This creates traffic congestion.
- Accessible Taxis business gone to Access Calgary. Recently another company (Care Calgary) has been contracted for Accessible Wheel Chair trips, so now there are very few wheel chair trips for ATPL's. Moreover ATPL's cost more than the normal cab and their running cost is more than TPL.
- 7. Airport and Hotel Contracts: As Airport contract is with one broker and downtown hotel stands are with another brokers. Now Airport cab operator is not allowed to pick up fare from downtown hotels and other brokers cab drivers are not allowed to wait for fare at Airport. Cab operators of these and other small companied keeps on juggling between Airport and Downtown. They waste their energy, gas and time and makes less money. This creates traffic congestion, more greenhouse gases and more pollution.

We demand that at present we need to

- 7.1. To wait until the 2015 when full cab operation data from the brokers will be available with city for extensive study purpose.
- 7.2. Fix the dispatch system by the brokers or establishing centralized dispatch, so city will be having the exact picture of demand and supply of taxies. This will immediately eliminate multiple calls by the customers and less no trips by the cab operator.
- 7.3. Open all stands for all brokers thus creating level playing field for all cab operators. This will solve lot of problems and will improve earning ration to the idle ration of the cab drivers by providing timely and efficient service.
