Chair, Truck Route Committee

Re **Beddington Trail Sound Attenuation**
File No: TT2014-0142

The Truck Route Committee (TRC) has reviewed NM2013-27 and citizen concerns regarding noise along the Beddington Trail truck route. The TRC has assessed the proposed alternatives and how they impact truck route stakeholders and is supportive of:

- The construction of a sound barrier to achieve the standards for sound in a residential area; and
- A temporary restriction on the hours of truck route use until such time as a barrier can be constructed. The TRC suggests the time restriction be 19:00 – 06:00 hours on Monday to Saturday, and no truck route traffic on Sundays. This restriction is similar to existing time restrictions in the area. The aggregate trucking requirement includes being available to reach construction project job sites with materials by the 07:00 start time.
