

To Whom it May Concern,

As per my email of July 27/19 to Lindsey Ganczar, strongly objecting to above referenced land use amendment for the reasons outlined therein; along with Lindsey Ganczar's self explanatory email response of July 29/19 (both emails being attached below); I hope you can appreciate why I was very distraught to hear from a neighbor, that the City Planning Commission had already approved this amendment back in Oct 17/19, with absolutely no notification or communication whatsoever!!

It is now my understanding, that I must re-iterate my objections by today's date (Dec 9/19) in order to be considered at the upcoming City Council Meeting on Dec 16th/19 meeting!

This is a disturbing total lack of transparency, and a complete disregard for any effective and timely communication.

Why have I and others not been notified or informed of any or all of this?

Why only a week before Christmas, when people are very busy or away, does the City decide to hold the council meeting?

In case I was not clear enough in July, and for the reasons stated in my July 27/19 email below, I remain strongly in objection to the said Land Use Amendment.
