Feedback:

I absolutely do not want a building going up that is up to 40m tall!! That is way out of order for anything I have seen in a suburban neighborhood of Calgary being that I have lived in the SE sub-urbs for 18 years. We are not down town. If they build that high it will obstruct all views that I have from my residence which was sold to me with the current view and the seller stated it would only be commercial dev such as restaurants, grocery, etc. It will also block sun and look way out of place hovering over the whole line of residence along 210 ave that already exist. The city needs to clarify more on what is projected to be built in this area , types of businesses etc. As no one can really get a straight answer from any of the builders.
