Dear Ezra

Re: LOC2015-0161 – 15 Street SE Road Closure Application

Water Resources filed a permanent road closure application for 15 Street SE between 42 Avenue SE and 46 Avenue SE on October 16, 2015. The file number is LOC2015-0161.

Since then, the situation has changed and Water Resources does not require the road closure in the near future. We will be engaging with other stakeholders (Green Line, Transportation Planning etc.) regarding the schedule and possible future impact of their planned projects on the local road network. Working collaboratively with these stakeholders will result in a clearer understanding of the wider impact of these projects and will allow The City to more effectively engage all concerned parties including local businesses at the appropriate time.

Based on the meeting with City Planning Department on March 20, 2017, this letter is to formally inform you that Water Resources will not be pursuing the Application LOC2011-0161 -15 Street SE Road Closure at this time and wish withdraw the application.

Sincerely,

Yanlong Niu
