DP6.7

OGDEN FAMILY HOUSING

MATERIALS SELECTION

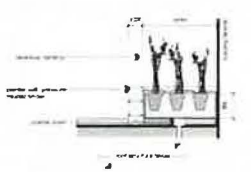

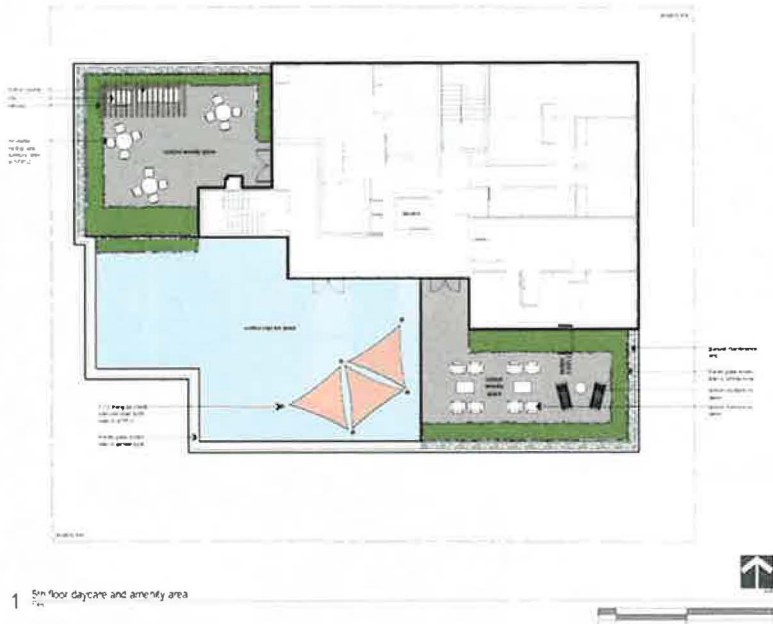

Material application on the proposed development advocates the programs situated within the building. Vertical metal and fire cement siding are utilitarian and stable applications in their nature, responding to the support anchor that the partnership between Ogden United Church (OUC) and The Mustard Seed (TMS) will offer to the community. To present an explorative flair of wit and playfulness, vividly-toned orange and yellow aluminum composite panels inhabit moments in an otherwise ordered facade. These instances expand on the aforementioned partnership between OUC and TMS: striving to not solely support members of community, existing and new, but enrich it through its unique uses and the demographics it celebrates. To expand, the Ogden Family Housing initiative brings families with small children to an established community where their symbiosis will result in the holistic betterment of the community. Wood grain cladding softens the integration with the pedestrian realm to create a welcoming atmosphere for residents and the local community alike.
