

Community Association Comments

2020 September 17

Hi Angelique,

The Community Association only has one concern with this application. We are slightly hesitant about the increase in units the rezoning would allow and the resulting impacts to infrastructure if the Developer chooses to pursue that increase.

We do understand this is a housekeeping application to bring those properties up to the current land use designations and is much easier to achieve at this point in the process versus an application for each individual property down the road.

Thank you

Nicole Marr
