- PROGRAM**
- ADMINISTRATION
 - BACK OF HOUSE
 - BALLROOM
 - BUILDING SUPPORT
 - KITCHEN
 - MEETING
 - MEPT
 - PREFUNCTION
 - RESTROOM
 - STORAGE
 - VERTICAL CIRCULATION

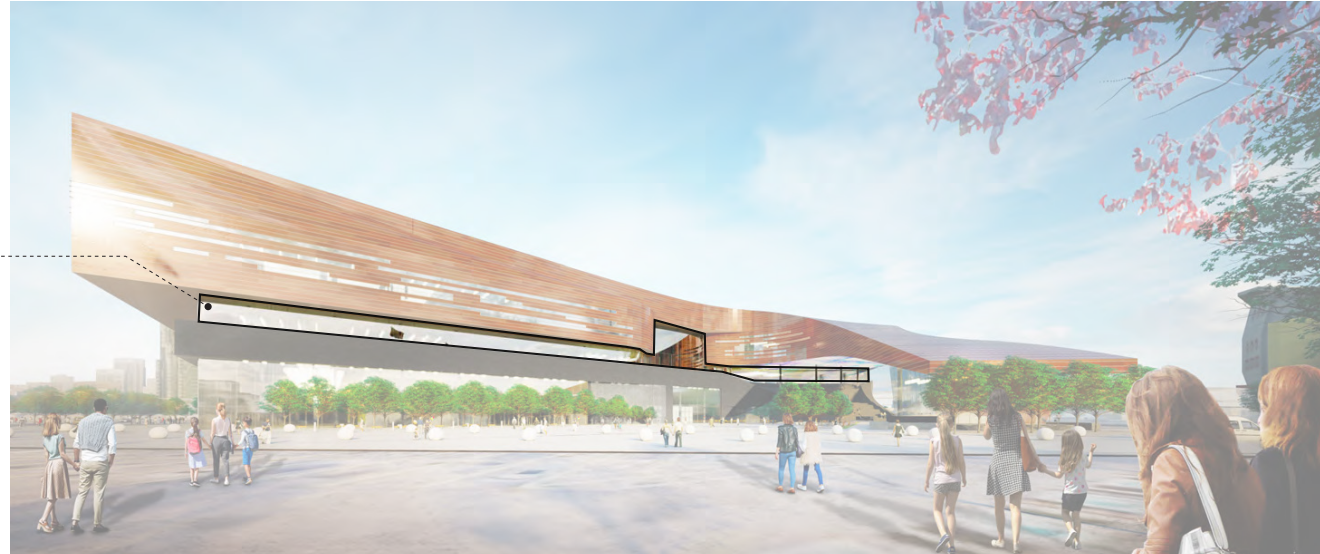

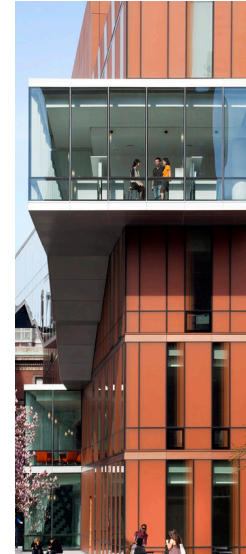

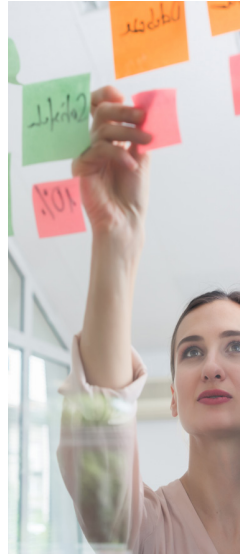

Third Floor Plan

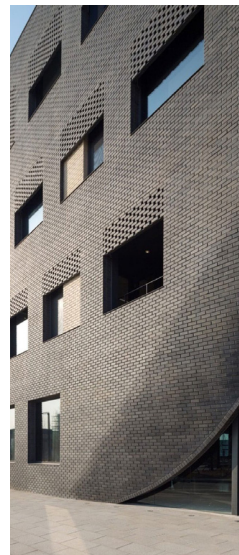

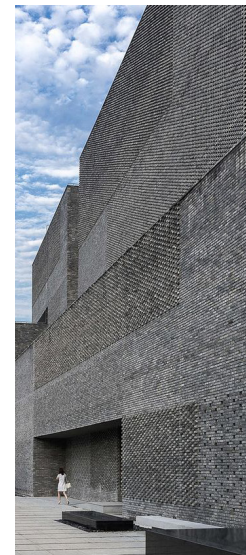

Exterior Design - **Material Inspirations**

A natural patinated metal panel system encapsulates the entirety of the dynamic upper form of the expansion. The unique material is meant to resemble the ornate metal work that permeates stamped culture and to further express the grit and hardworking values that represent the Calgary Stampede.

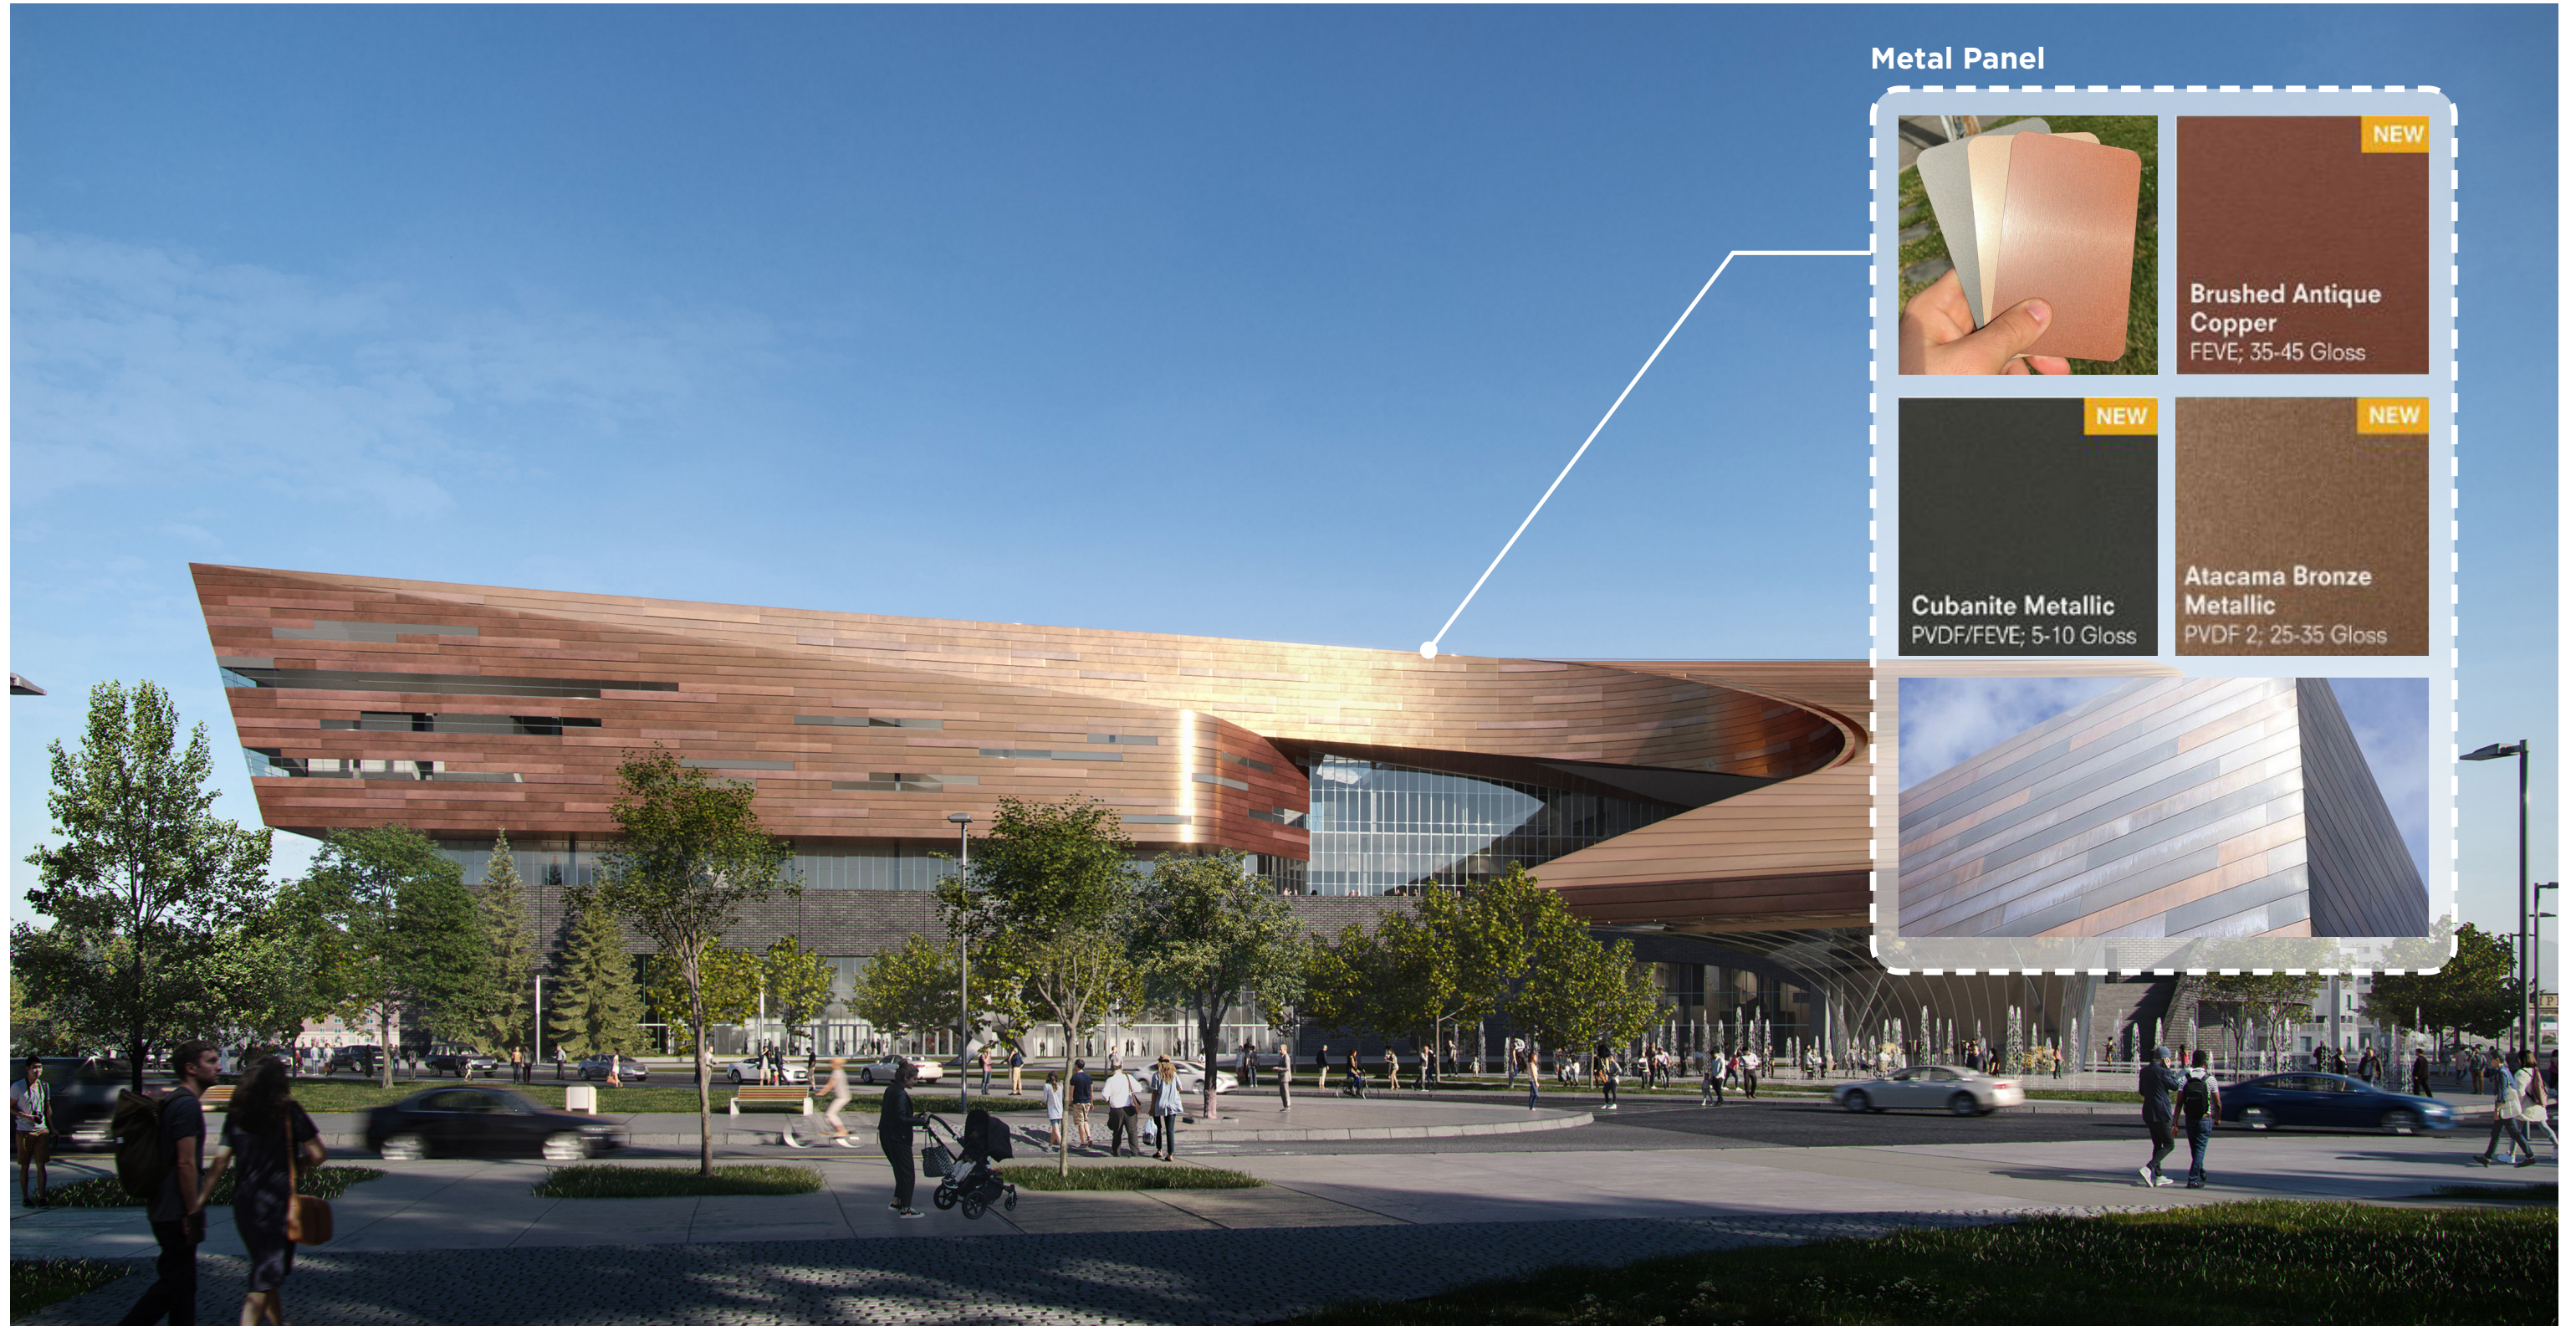

By letting the light in, each respective patron of the expansion will never be more than a few steps away from natural light and views out to Stampede Park. Meeting rooms, food service, registration, and casual gathering space will be surrounded by glazing, opening the expansion to the sunny Calgary weather.

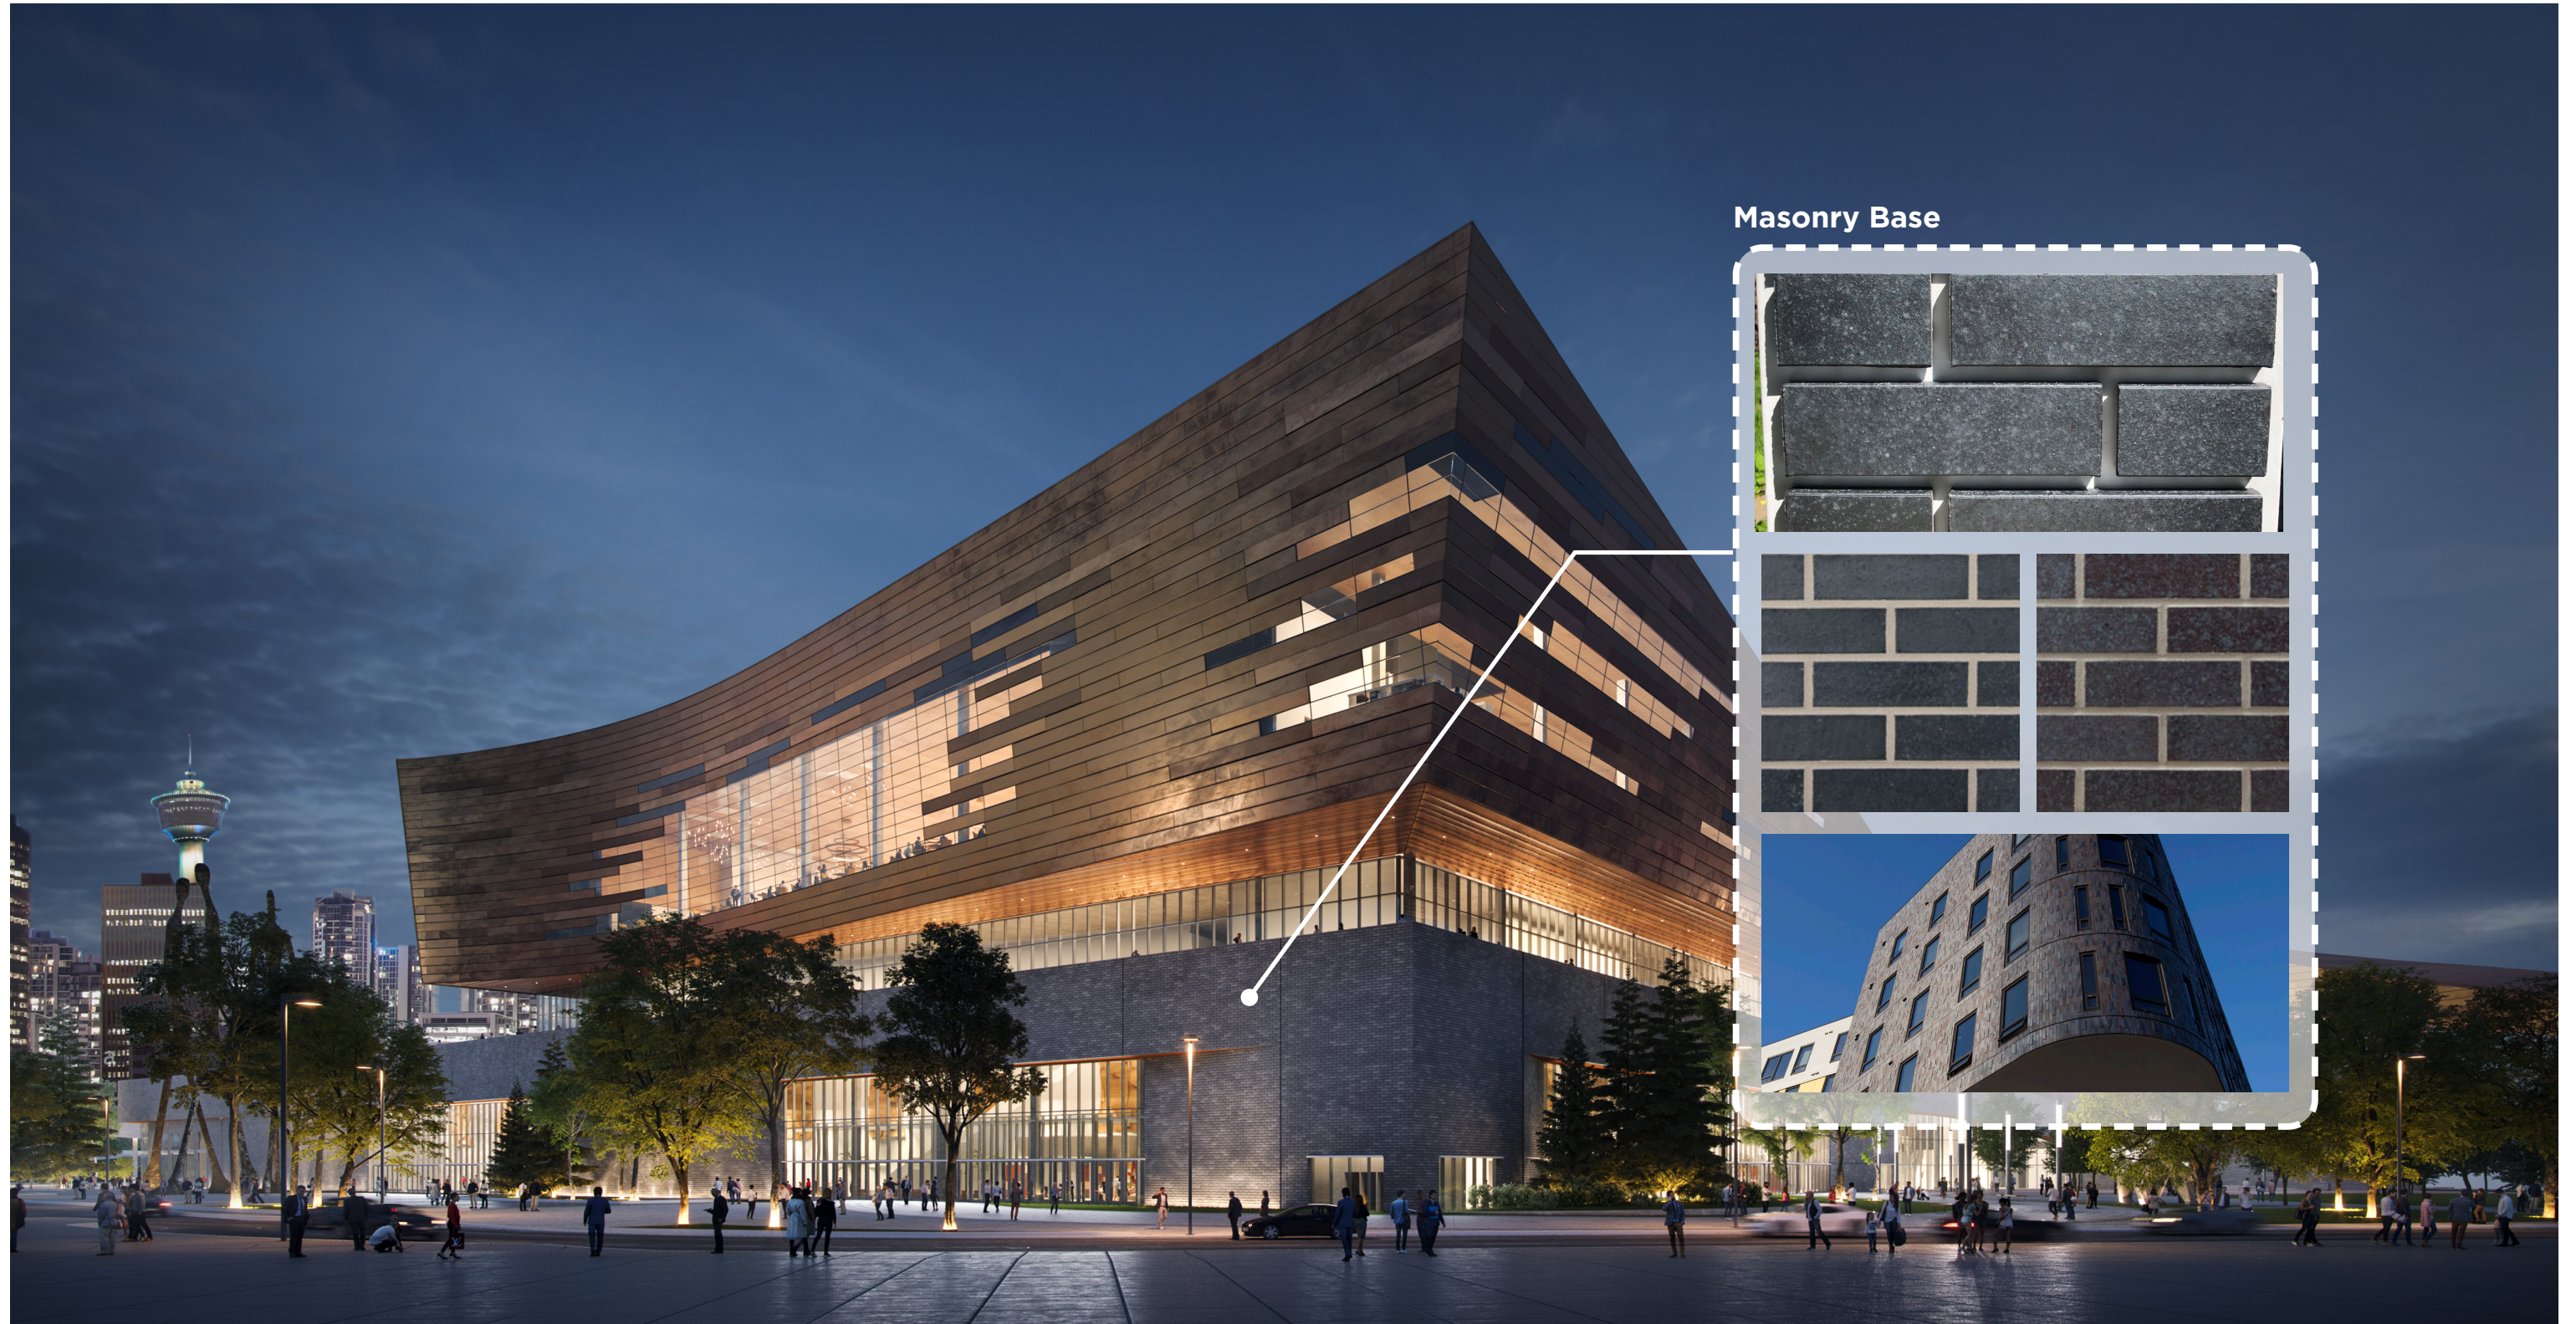

A sturdy masonry base anchors the expansion to the ground, tying into the grit that represents so much of Stampede culture. Strategic openings align with entry vestibules and floor to ceiling curtain wall allows natural light to fill the entire ground level prefunction.
