Public hearing item (required - max 75 characters) 7.6 Cost to Reintroduce Fluoride in the Water Treatment Process

Date of meeting Dec 1, 2020

Members of the Finance Committee (Mayor and Councilors):

I strongly encourage you to vote in favour of reinstating Fluoride into Calgary's water.

Many children are suffering in the city due to dental decay.

The economic downturn has left many without dental health benefits. The pandemic has made it even worse as dental services are harder to access. Fluoride is one way to help people of lower means have equity when it comes to oral health.

Over a 20 year period, and approx 1.3 Calgary residents - the cost of Fluoridation will only be \$1.29/person/year. The dental cost savings with Fluoridated water are estimated between \$30-\$40/year, which is great return on investment!

Comments - please refrain from providing personal information in this field (maximum 2500 characters)

I would like to remind Council, that Calgarians have voted twice for Fluoridated water.

Edmonton, Red Deer, and Lethbridge all have water Fluoridation. We should look after our citizens, and do the same.

The attached 8 second video shows a 6 year old having to endure the pain of a dental procedure caused by tooth decay. The video is hard to listen to as the child screams

during the procedure. Of course, this didn't have to happen if Calgary had water Fluoridation.

Council, please do the right thing and reinstate Fluoridation!

Thank you,
Jason Sokolosky
Montgomery Resident

Public hearing item (required - max 75 characters) Water Fluoridation re-introduction proposal is an affront to all Calgarians

Date of meeting Dec 1, 2020

Comments - please refrain from providing personal information in this field (maximum 2500 characters)

Good morning,
I am submitting this documented disclosure and evidence and personal opinion based on investigative research as my opposition to the tabling of the consideration for re-introduced water fluoridation in the City of Calgary.
It is astonishing to me how in the days and times of the vast amount of evidence and historical facts and truths about the toxicological effects of this known nuerotoxin, it would still be considered as beneficial in any way.
This is an affront to the community of Calgarians, who are either too busy, too lazy or too dumbed down due to the effects of this nuerotoxin to have the ability to communicate the toxicity and lack of true science supporting this initiative.
I am aware we have Dr.Bob Dickson of Maxwell Dental in Calgary as an advocate for Safe Water Calgary and he has clearly articulated the extremely invasive and dangerous effects of this ions detrimental actions to virtually all human body systems and plays absolutely no role in any vital function. This highly invasive ion has been proven to negatively affect the gut biome which is an extremely important factor in our human immune systems, which could prove of value considering we are in a covid19 global pandemic. This toxin has also been proven to cross the blood brain barrier which of course will have a significant negative impact on the brain due to the bio accumulative factors. One partucular factor of consideration that rarely receives attention is the fact that fluoride treatment has been proven to bio accumulate and calcify the pineal gland of the human brain. Once heavy metal ion toxicity enters the brain it does not leave

and will ultimately lead to premature neurological disorders.

The re-introduction of water Fluoridation is based on flawed science as many dentists across the world have found that fluoride has zero net beneficial affect on the prevention of dental caries. And if for some reason, someone feels compelled to utilize fluoride they are welcome to purchase all the topical products of toothpaste and mouth-wash that are propagating the fraud of this archaic and corrupt medical tyranny upon unsuspecting populations.

Forcing people to pay for infrastructure, mismanagement to ingest fluoride against their will and without their consent is medical tyranny, deceitful, a provable fraud and a crime against humanity.

I implore you Naheed Nenshi and council cohorts to educate yourself on the damaging consequences of this system of forced medication
