

Industry-City Work Plan

2020 Year-End Update

Josh White
Director, Calgary Approvals Coordination

PUD2021-0063 Presentation
ISC: Unrestricted

Background on the Industry-City Work Plan

- The Industry-City Work Plan was originally directed by Council in 2016 January (C2016-0023) to establish a closer working relationship and partnership between The City and the land development and building industry and to create increased accountability around process improvements and work related to growth matters.
- This work plan is established and governed by the Developer Advisory Committee including City staff and representatives from the development industry.
- In past years, the City Planning & Policy Work Plan and the Industry-City Work Plan have been brought forward concurrently to City Council.
- Administration and Industry will continue to evolve the Industry-City Work Plan to exist more productively with other work planning in the Planning & Development Department.

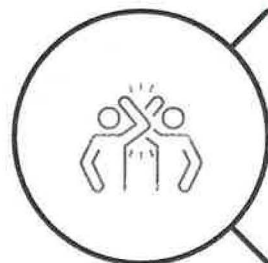

Industry and The City are committed to advancing initiatives set out in the Industry-City Work Plan.

Monthly Developer Advisory Committee meetings are held to monitor deliverables and receive updates about service delivery.

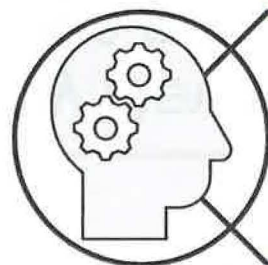

The Industry-City Work Plan is an important strategy to improve the context for development in Calgary which ensures positive planning outcomes for Calgarians.

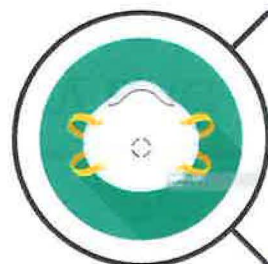

Reflecting on 2020

Strengthened
relationship with Industry

Innovative and effective
relief measures =
financial flexibility

Deferred some work to
2021 due to COVID-19
and/or refocusing scope

The Work Plan is Evolving
