Subject: 2017 Jan 16 Public Hearing on Planning Matter
Importance: High

Hi Susan. Happy New Year!

I hope this email can reach you and is still accepted to be included in the Agenda of Council for the Public Hearing held on January 16.

We, as one of the long time residents since year 2000 in the area, are strongly against the Land Use Designation (zoning) amendment for the property located at 32 Bridlecreek Gate S.W. (Plan 9712089, Block 5, Lot3)

The area has been a wonderful great quiet and clean neighborhood for a long time. Residents enjoy the City web land just a few steps away, and many kids play and walk on the street without worrying about busy traffic.

The change of the Land Use would definitely change the area's living environment. As a matter of fact, we have recently seen more cars parking on the street, and street road is getting narrow and narrower. There have been more strangers in and out in the neighborhood. Seniors and kids need to walk more carefully on the street.

To maintain the same good quality of neighborhood, we strongly suggest City Council would consider our concerns and make a decision that fits needs of majority of residents in the area.

Best regards,

Bill
