Climate Resilience Strategy Presentation

June 23, 2021

**We fully support the
recommendations of the
Calgary Climate Panel.**

We thank the City's climate team for their hard work, realistic assessment of the challenges, and setting out a road ahead.

We support:

Especially these recommendations of the Climate Panel

- ▶ A 2050 net-zero emissions target
- ▶ A fair-share emissions target by 2030
- ▶ Quantitative targets & performance measures
- ▶ Accelerated investment

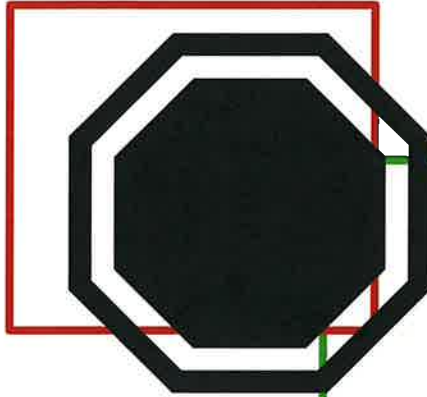

We support:

- ▶ A Green Building Standard that is net-zero **NOW**
- ▶ Top priority for walking, cycling, and transit
- ▶ Integration of GHG emissions and climate-related risk into standard City and community practices
- ▶ Properly valuing natural systems in municipal financial planning and reporting

We support:

- ▶ A low carbon financing program
- ▶ Ensuring Calgary is a low-carbon economic hub and a climate- resilient city that is attractive to investment
- ▶ Formalizing climate change governance at The City of Calgary

We do not support:

- ▶ Continued lagging behind other cities.
- ▶ Promotion of biofuels.
- ▶ Carbon offsets
