

Dear Neighbours:

The owners of 110 Panamont Rise NW is proposing a land use Redesignation for the purpose of a secondary suite. The suite is a mother in Law suite which will be used by family and friends. There will be no increase to parking within the street as we will park within the driveway and garage and use the street directly in front of the house if required. The living situation will not change within the house. There is no exterior construction required or footprint added. We will be improving the landscaping for amenity space. A building permit will also be obtained to ensure safety measures and we will meet all development guideline rules as per City of Calgary land use bylaw 1p2007.

Should you have no objections towards our suite and offer us support for our public hearing, please sign below so that we can present to council.

Thank you
