Subject: LOC-2015-0030 JCC Expansion Proposal Bylaw#115D2016

Members of the Palliser Bayview Pumphill Community association have been consulted regularly on the proposal to expand the Jewish Community Centre. There was excellent engagement with our board and many opportunities to discuss our questions and concerns.

We are supportive of the plans to expand the JCC with new housing, recreational, educational and retail options for our community members. Although there have been concerns about traffic and parking we feel these concerns can be dealt with at development permit stage. With the ring road construction and transit projects planned, it is difficult to accurately predict what the traffic situation will look like in 10-15 years when this project will be completed.

We look forward to working with the JCC at the development permit stage and continue to engage and consult community members.

Thank you
