

# Applicant Outreach Summary

2021 June 22

Project Name: 204 33<sup>rd</sup> Avenue NE

Did you conduct community outreach on your application? Yes

## **Outreach Strategy**

On March 2, 2021, k5 Designs placed a sign (as per the attached PDF) in front of the subject site at street level. The sign is intended to garner community engagement and develop a connection with members of the community. We also contacted the Community Association of Highland Park to build a connection and garner input in regards to the land use re-designation.

## **Stakeholders**

The primary stakeholders are the nearby residents within close proximity of the subject property (members of the community) and the local Community Association (the Highland Park Community Association).

## **What did you hear?**

We did not hear any feedback or input from any members of the community. We did receive a response from the Highland Park Community Association; there is no objection to the land use re-designation – the only concern is the privacy of a larger structure looking over into backyards of the neighbour properties.

## **How did stakeholder input influence decisions?**

As there was no feedback from the community members, there was no influence on the decisions made. The Community Association also did not have any influence on the land use re-designation as they had no objection to the project to begin with.

## **How did you close the loop with stakeholders?**

We were unable to close the loop with one of the two stakeholders as there was no response from various community members. The second stakeholder, the Highland Park Community Association did respond; we are able to close the loop successfully there are no objections from their end.
