Today at YYC:

- ✓ Great air service
- ✓ Capacity to grow
- ✓ AVPA protection since 1979
- Context of an Urban Airport
 - It is impossible to arrive & depart aircraft without some community impacts

The Noise Management Team

What has the Committee accomplished?

1. 10 vs 15 degree divergence
2. Delay turns to 1000 feet
3. Preferred north departure procedure

Objectives:

- Maximize flights over commercial areas
- Maximize altitude of aircraft flying over residential areas

Downwind Leg Analysis

- The Authority has engaged a firm to design a noise study along downwind flight paths
- Working with Community Associations and area Councillors, locations for noise monitors for the study will be assessed

YYC is committed to:

- Listening to stakeholders and the community
- Acknowledging and considering feedback
- Assessing and understanding community impacts

Connectivity Program

- Building Expansion
- Moving sidewalks
- **YYC Link** Transit System

Connectivity Program

- A new Connections Centre and related processes to facilitate the connection of passengers between different sectors
