Feedback:

I support this initiative for land use change in my neighbourhood. Jeannine is a strong ambitious individual who loves her community and bringing people together. Her Physical Therapy Clinic will most definitely be an asset in this location. She has helped me with my physical health treatments, along with always being there for you if you need someone to listen. You will not regret making this Clinic and amazing person apart of our community. Thank you.

Feedback:

I'm very supportive of this. As a resident nearby I think it's great to see the original homes maintained and repurposed for a new use rather than taken down and replaced with infills. It's also great to have additional health services in the area!

I believe that a variety of businesses makes a community desirable and keeping accessible healthcare in our community while maintaining a heritage home is the definition of Community Betterment. I support this application.

I completely support the opening of Jeannine's business at this location. Not only will this enhance the vitality of our neighbourhood, it also saves a heritage house, preserving a piece of this areas unique history. I look forward to the energy that this development will add to our ever growing community.
