Revenue Neutral Tax Explanation

Why is Revenue Neutral Important?

The City's revenue neutral tax system is consistent with certain principles within the *Municipal Government Act* (MGA) and Alberta Municipal Affairs (AMA) guidance. This ensures that:

- Total tax revenues do not change automatically with assessment changes year over year, which
 creates less volatility; and
- Any tax revenue change brought forward by The City is communicated separately through the budgetary process.

Conversely, in a rate-driven tax system, assessment value increases or decreases directly impact the amount collected through property taxes.¹ In this system, the assessment is not only responsible for distributing property taxes but controls the magnitude of property taxes as well.² This system fails to meet the test of open and transparent property taxation.³

The revenue neutral tax system makes certain that the assessment process remains a distinct and separate process from the budgetary process. Revenue neutral ensures that no new taxes will be collected due to the annual reassessment process.

Revenue Neutral and the Municipal Property Tax Rate Calculation

Once all properties are reassessed and the assessment roll is finalized, a revenue neutral tax rate is determined.

Municipal Revenue Neutral Tax Rate = <u>Last year's revenue required by The City of Calgary from property</u> <u>tax</u>

This year's total assessment

When property values go up, the revenue neutral tax rate decreases and when property values go down, the rate goes up.

Council sets the budget to ensure that The City collects only what it needs to meet its financial commitments: the operating and capital costs of serving a community of more than one million people. To get the amount of revenues required from property taxes, The City takes the overall expenditure and subtracts all other sources of revenue such as license fees, user fees and provincial grants. The remainder is the amount of money the municipality needs to raise through property taxes in order to provide services for the year. This revenue requirement is then used to calculate the tax rate. Any changes in the revenue requirement is applied to the revenue neutral tax rate. Or simply, the tax rate calculation is as follows:

Municipal Tax Rate = This year's total revenue required by The City of Calgary from property tax

This year's total assessment

"Standard on Property Tax Policy." *International Association of Assessing Officers*, 2020: s. 6.2. https://www.iaao.org/media/standards/Standard on Property Tax Policy.pdf. See also International Association of Assessing Officers. "Standard on Property Tax Policy." *International Association of Assessing Officers*, 2010: s. 5.2.1.

² Ibid.

The tax rate is then applied to each individual property assessment using the following formula:

Property Assessment (\$) x Municipal Tax Rate = Municipal Taxes Payable

Because of revenue neutral, taxpayers are assured that The City does not:

- take advantage of rising market values to collect more tax than it needs, or
- calculate property taxes based on the increase or decrease in market value from one year to the next.

In surveying other jurisdictions across Alberta and Canada, all who have responded have confirmed the use of the revenue neutral system:

Municipality	Taxation Method		
Calgary	Revenue Neutral		
Camorse	Revenue Neutral		
Edmonton	Revenue Neutral		
Lethbridge	Revenue Neutral		
Red Deer	Revenue Neutral		
Grande Prairie	Revenue Neutral		
St. Albert	Revenue Neutral		
Strathcona County	Revenue Neutral		
Medicine Hat	Revenue Neutral		
Airdrie	Revenue Neutral		
RM Wood Buffalo	Revenue Neutral		
British Columbia - Province Wide	Revenue Neutral		
City of Winnipeg	Revenue Neutral		
City of Saskatoon	Revenue Neutral		
Ontario (MPAC) - Province Wide	Revenue Neutral		

Though the revenue neutral system is not required, many jurisdictions choose to use it as it provides confidence in the integrity and transparency of the property assessment and tax system.

Within Calgary, the revenue neutral calculation takes place on an annual basis with the finalization of the assessment roll in December. Should The City's property tax budgetary requirements change, the tax rate is further adjusted, typically in spring of each year, to bring in the amount of revenue needed as directed by Council when the property tax bylaw is approved.

The revenue neutral model means that, excluding Council decisions to change the tax rate, for every additional tax dollar levied to one property, there is a tax dollar reduction in another. Assessment acts only as a mechanism to annually distribute taxes to each taxpayer in an equitable manner. The assessment process does not determine the overall level of taxation, the Council approved budget does. This is revenue neutrality in action.

How does this work for the average residential homeowner?

ISC:UNRESTRICTED

The City begins by revaluing every property in the city based on real estate market transactions that have occurred. A typical assessment value change for residential properties for the whole city is then determined. If the homeowner's assessment changes by the same amount as the typical change, the amount they pay in property taxes will be unchanged as a result of the reassessment. If their value EC2021-1493 Attachment 2

Page 2 of 5

change is above the typical, they will see a tax increase as a result of the reassessment and if it is below, they will see a tax decrease.

The above example assumes that The City's revenue required from property taxes stays unchanged from one year to the next based on Council's approved budget. Table 2 shows an example of reassessment impacts on property taxes using revenue neutral.

The revenue neutral system ensures that a municipality can meet its budgetary requirements each year and does not directly tie the volatility of the real estate market to the revenues collected. In this way, property owners are ensured of a fair and transparent system and that the municipality only collects what it needs each year.

If your property's value change is:

Assuming a 0% Council approved budgetary change.

Table 2: How Revenue Neutral Works – A Typical Cycle

The figures below are hypothetical and are intended for illustration purposes.

Year 1 Tax Rate Calculation	House 1	House 2	House 3			
Budget ÷ Assessment Base = Tax Rate						
\$8,000 ÷ \$800,000 = 0.01			<u> </u>			
Assessed Value	\$150,000	\$250,000	\$400,000	= \$800,000 Assessment Base		
x Tax Rate	x 0.010000	x 0.010000	x 0.010000			
= Year 1 Taxes Payable	= \$1,500	= \$2,500	= \$4,000	= \$8,000 Budget Requirement		
Year 2 Reassessment	\$165,000	\$275,000	\$440,000	= \$880,000 Total		
Assessment Change (per cent)	+10 per cent	+10 per cent	+10 per cent	= +10 per cent overall increase		
Year 2	Year 2 Revenue Neutral Tax Calculation with No Budget Change					
Budget ÷ Assessment Base = Tax Rate						
$\$8,000 \div \$880,000 = 0.009091$						
Assessed Value	\$165,000	\$275,000	\$440,000	= \$880,000 Assessment Base		
x Tax Rate	x 0.009091	x 0.009091	x 0.009091			
= Year 2 Taxes Payable	= \$1,500	= \$2,500	= \$4,000	= \$8,000 Budget Requirement		
Year over Year Tax Change (per cent)	0 per cent	0 per cent	0 per cent			
Year 3 Reassessment	\$165,000	\$269,500	\$418,000	= \$852,500 Total		
Assessment Change (per cent)	0 per cent	-2 per cent	-5 per cent	= -3.125 per cent overall increase		
Year 3 Revenue Neutral Tax Calculation with No Budget Change						
Budget ÷ Assessment Base = Tax Rate						
\$8,000 ÷ \$852,500 = 0.009384						
Assessed Value x Tax Rate	\$165,000 x 0.009384	\$269,500 x 0.009384	\$418,000 x 0.009384	= \$852,500 Assessment Base		
				- \$9,000 Rudget Requirement		
= Year 3 Taxes Payable	= \$1,548	= \$2,529	= \$3,922	= \$8,000 Budget Requirement		
Year over Year Tax Change (per cent)	+3 per cent	+1 per cent	-2 per cent
