City clerk, city hall Calgary, Joshua a d Jong, whom it may concern

Reference: by law #60D2016
Address: 7400 80 ave NE

I am writing to object to the zoning reference # 60D2016 I have examined the plans and I object strongly to the development of these type of residential m-1 d60 (multi-residential-low profile) this type of residential construction will directly effect the loss of property value which is my major concern and not only that street is already so busy and this will add more vehicles on the street parking and traffic in the area. By doing so noise which is going to increase can cause major loss of amenity. There is no privacy already because of multi story apartments across the street peeping our house with there front porch decks and windows. By doing this type of construction city is over developing this area by 60 to 80%. and may effect the outlook of the area. This type of box building around my house going to cut the view and property value. As per the builder of our house told us that there is only single family detached garage houses were suppose to be build(r-1) across the street. I would like to request to the city to look into this matter on a very serious ground as we work very hard to pay our mortgage to wards our property and like to keep up the value of our house.

I would like to attend the public hearing, if I may so please let me know where and when.

Thank you for considering my objections in your ruling

I am writing this email to object to the zoning reference # 60D2016

I have examined the plans and I object strongly to the development of these type of residential m-1 d60(multi-residential-low profile). This type of residential construction will directly effect the loss of property value which is my major concern and not only that, the street is already very busy and this will add more vehicles on the street parking and traffic in the area. By doing so, noise within the area is going to increase which can cause major loss of amenity. There is already a lack of privacy in this area because of multi story apartments across the street with clear views of our houses with there front porch decks and windows. By doing this type of construction, the city is over developing this area by 60 to 80%. and may effect the outlook of the area. This type of box building around my house will cut the view and property value, a major concern for hard working citizens. As per the builder of our house told us that only single family detached garage houses were suppose to be build(r-1) across the street. I would like to request that the city look into this matter on a very serious ground as we work very hard to pay our mortgage towards our property and like to keep up the value of our house and there are many in this area that agree with me on this matter. It is the right of the citizens in this residential area to have their voice heard before this plan is initiated and thus I urge the city to look into this, as ignoring this issue will be detrimental to the well being of many..

I would like to attend the public hearing, if I may so please let me know where and when.

Thank you for considering my objections in your ruling
