Applicant Outreach Summary

Outreach Strategy

- The project's community outreach assessment impact score indicated low impact ("1A")
- On August 4, 2021, we contacted the Glenbrook Community Association and ward councillor's office via email.
- On August 4 & 5, 2021 we knocked on the doors of 90 households within a 90 metre radius of the subject site and also left project information postcards with each of them. We also delivered 110 postcards to Glenbrook resident households but did not have an opportunity to speak with them.

Stakeholders

- Glenbrook Community Association
- Ward Councillor's Office
- All residents within 90 metre radius of the subject site (actually spoke with residents of 30 of those households)
- Other Glenbrook residents outside of the 90 metre radius

What We Heard

- The main concerns our office got are with regards to increased traffic, increased density, height, shadow effects, and safety.

How did stakeholder input influence decisions?

- We believe the issues identified can be properly dealt with at the development permit stage.

How we closed the loop with stakeholders?

- If residents follow up with us, we setup meetings to discuss any thoughts or concerns they have.
- We’ve reached out to the new ward councillor to see if they have any feedback.
