

Applicant Submission

Date:

2021-09-16

Dear City Council:

My property is located in the corner of 577 Northmount Dr. NW Calgary which has a capability of 38 children. I am requesting a rezoning re-evaluation as the current demand for child care in my area is greater than 6 children for a dayhome. Many frustrated parents express concern for the lack of proper care facilities or the costs associated with any of the commercial centres in the immediate area of my property. Having my home very near to a school is perfect for those parents who are already limited in time to bring their children to a suitable and near care facility. My location is perfect for those parents who already have children enrolled in the school that is near to my daycare as it provides excellent convenience for delivering their child to the school and without further travel, deliver their younger children to child care. It is the perfect situation for all of them and they have all expressed dismay that I am unable to accept them even though my home is more than suitable for a greater number of children to care for. The proximity to a school and park is the perfect combination for the hurried parents.

On my property, I could offer 3 employees parking stalls and 4 pickup-drop off parking stalls.

I appreciate City Council for this consideration of re-designation request.

I am anticipatory for a positive outcome.

Sincerely,

Yanmei Zhang
