Vaccine Passport program is a form segregation, it is a form of discrimination. Once City controls and discriminates people for their medical choice, which is very private area, I am positive that City will control other aspects of people's lives. Many vaccinated people are catching and trasmissing Covid, Vaccine passport program does not serve its purpose. Please remember you are servant to Calgarians, not the other way around.

Masking and vaccination passports

Are you in favour or opposition of the issue? (required)

In opposition

If you are submitting a comment or wish to bring a presentation or any additional materials to Council, please insert below.

Comments - please refrain from providing personal information in this field (maximum 2500 characters)

Vaccination has proven (around the world) to be an ineffective means of stopping infection or transmission of covid - 19.  
Masks has proven to also be an ineffective means of stopping transmission. That's why doctors and nurses historically have never worn masks in hospitals, as respiratory disease cannot be stopped with a mask.

Our children, adolescents and ourselves (adults) have suffered too much trauma, mental health decline (Canada and Australia are the 2 countries with the lowest mental health index in the world!) regarding these useless methods of preventing infection and transmission and data supports it.

Remove all masks and vaccine passports for all ages immediately.  
Stop the discrimination and segregation of people. Treat everyone equally.

Thank you

We need true for-the-people leaders who will guide Calgarians out of this pandemic through hope and reason. The mandates and restrictions have only served to provide division, discrimination and hate between fellow Calgarians. It has been proven time and again that they do nothing to increase public health, safety or wellbeing. Governments all over the world are abolishing the arbitrary, overreaching rules that have done nothing to "stop the spread" of Covid. Will this council serve their constituents and begin the healing needed to unite this once-great city — better and stronger than ever? Or will they let their egos dictate their policies and bow down to the fear and hate supported by the vocal few who may never escape the Covid cult?

Hi

I would like to say that I am so happy that city council voted against having our own vaccine passport program here in Calgary. This pandemic has been hard on all of us but especially on the people who have been ostracized and not been able to attend certain places because of their vaccination status. It is becoming ever more clear that there is more harm than good in this program. We have to remember what Dr. Hinshaw said, that our health covers a lot of different aspects, not just covid. Our mental health is very important and that of our children. We should be on the same page as the rest of the province. We need to stop having so many damaging restrictions. Those who are at risk can take the necessary precautions. We never should've used a restriction that discriminated against people's personal medical decisions, and we sure shouldn't continue it!

I am against vax pass and masks bylaw. If someone wishes to wear one, they are free to do that. I DO NOT wish to be muzzled anymore. Give me my freedom of choice back! I am tired of those who wish to put muzzles back on people and kids. If they are afraid of maskless people and kids they can wear three masks, continue getting monthly boosters and live in a lockdown. It is their choice NOT mine! Leave me and my kids alone. Follow SCIENCE and STATS! 0.8% death rate in Canada and an average age 80+ is not a concern for me. Your fear stops where my freedom starts!

In regards to to the YMCA and all other Calgary facilities. I believe they should all be open access to everyone. The YMCA stands for young mens christian association. The Christian thing to do is not reject a 12 year old from playing basketball and swimming with his friends. The mission statement from the ymca is, "to put Christian principles into practice through programs that build healthy spirit, mind, and body for all,".

I would like to commend city council for their decision to no longer enforce Covid 19 Vaccine requirements in the City of Calgary. As a concerned parent of three children I can say I strongly oppose discrimination based on personal medical decisions. The vaccines have proven to not be effective at preventing transmission or illness and this discrimination especially against youth under 18 is unacceptable. I commend all council members who actually are "following the evolving science" and who voted against extending this program. Thank you for doing the right thing and giving children back the chance to experience a normal childhood once again.

Stop. The science is very clear that vaccines Do Not prevent transmission or covid. As per Pfizer documents and CDC findings and announcements. Masks do not prevent virus transmission and in fact are damaging particularly to children. Children born during this "pandemic " have seen a decrease of 23% in meeting their developmental milestones. The studies are freely available. Finally all of these " emergency " health measures are in fact government overreach of the highest order. You Do Not have the legal standing to produce orders for discrimination against people based on private medical information. It is in violation of the Canadian Bill of Rights. Enough already.

On behalf of group of Calgary and who were forced to be vaccinated I would like you to support cancellation of all COVID restrictions. Please advise the doctors early treatment options (for example Dr .Zelenco protocol) and allow the doctors to treat the sick. No politicisation of the health care. Thank you.

The suppression of scientific discourse over the past two years in the service of supposedly protecting the vulnerable has been a failure--to admit the failure and move on would be a terrific show of character and leadership, but to continue pretending otherwise would be an unforgivable example of intractable arrogance and foolishness

Despite the endless chanting of the phrase "follow the science" by officials in an attempt to sanctify their health measures and discredit dissent, there are many thousands of medical professionals and scientists from around the world (some of them Nobel prize winning doctors and medical researchers) who are following the science and drawing far different conclusions than those steering our public health policy. Our officials and their medical advisors claim the "science" upon which they base their policy decisions is irrefutable--the irony here is that THIS CLAIM IS ITSELF UN-SCIENTIFIC. Policies to date have failed miserably to contain this respiratory virus. The only things our public policies have thus far achieved are in spreading unnecessary fear, devastating the physical and mental health of countless individuals, and wreaking havoc and destruction on the livelihoods of our citizens. The Vaccine passport system was a travesty. Even the pharmaceutical companies themselves admitted that these shots did not prevent individuals from catching OR spreading the virus. Even IF these medications reduced hospitalization last year for a brief time they have certainly ceased to do so (as those fully dosed individuals inhabiting hospital beds will attest). What sense does it make to ostracize and limit individuals based on a distinction that doesn't exist? It bears repeating in case anyone is confused about this point -- Shot and Unshot catch and spread the disease equally. It's time to move on, drop the fruitless measures, let people live their lives, but above all stop the scapegoating based on "science" that clearly isn't.

I'm fiercely opposed to re instating Calgary's vaccine pass program. This was put into place under the misguided belief that unvaccinated citizens are a risk to the rest of the people of Calgary. This has since been proven to be ABSOLUTELY false, as shown clearly by vaccinated people becoming infected and spreading Covid. This is not misinformation, it is reality. Anyone who supports the program's continuation is not following "the science" but basing their decision on irrational fears and feelings made worse by a biased media. The discrimination must stop. We have to be allowed to live our lives and care for our mental and physical health as individuals. The continuation of this program would forever damage the fabric of our society, and I for one would immediately be looking to take my business out of the city. I would not be alone in that.

For the reasons I have included in my letter- I am am of the strong opinion - it is time to drop all Covid restrictions and make Canada great again.

The subject of Covid has caused more division, fear and destruction than anything I have lived through in my 53 years as a Canadian.

From the beginning there was a heavily skewed narrative- one that created fear and hyperbolized the power that media plays in public opinion. At the onset of the pandemic there were hundreds of international and world renown scientists (The Great Barrington Declaration as one example) stating the damage that is created by forcing societal lockdowns in an attempt to get ahead of viral spread. Like a dog chasing its tail, it can't be done. Adding to these lockdown measures, we denied elderly people in nursing homes and living independently visits from their loved ones (the only thing that most of these people live for). We were forced to wear masks in public, never proven in any studies to protect or prevent the spread of an aerosolized virus, and painted circles on floors to keep us initially socially distanced to be replaced by a more acceptable term "physically distanced." Lets face it apart is apart, the message was clear- everyone and everything was dangerous. Not once, and still to date, is there any mention of preventative measures to support ones immune system or early treatment protocols. There was and still is no recognition or mention of natural immunity. Vaccine protocols are inconsistent ie: some vaccines banned, some only recognized in some countries, time in between shots varies or is utterly ignored, exemptions impossible and unnecessary, mixing and matching of brands to name just a few. The vaccines should have never been the only hope and disappointingly regardless of the amount of booster shots people are still getting sick with Covid, spreading Covid and ending up in hospital with Covid.

Inconsistent rules like the closing of schools, gyms, yoga studios, places of worship while allowing crowds to shop in big box stores, have made people very untrusting of the supposed science our governments, health ministers and leaders speak of.

For 2 years Canadians have stopped living, while waiting for a virus to kill us. It is now well known there is 99.7% survival rate for those who contract Covid and more importantly for most it is nothing more than an illness with flu like symptoms. Enough is enough. We have lost, enough lives, enough friendships, enough family divided on the vaccine topic, we have lost ENOUGH- it is time to drop the mandates. NOW.

Re agenda item 7.17. The vaccination passport has done irreparable harm to our society. This was an extreme form of discrimination that has segregated and caused hate against a largely vulnerable portion of our population, including visible minorities and children, even at the school age level. It is my sincere hope that the city never revisits this measure, and that the mental and psychological harms, as well as economic and societal well-being are considered equally to health. There is so much deep resentment over the coercion of these mandates, and I fear re-introducing them is a step we will never recover from as a city, province, country or world. Where there is risk, there MUST be choice. Also, I believe strongly that our Alberta government, who is responsible for healthcare in this province, should be the ones to manage the health portfolio in it's entirety. Thank you.
