# Executive Summary

## Violent Crime

In 2019, violent crime increased 29% over the five-year average but was similar in volume to the preceding year. The increases in recent years have been driven by assaults, including domestic assaults and to a lesser degree, sex offences.

Over the past two years, Calgary has had a similar rate of homicides to a decade ago, following 3 years of higher than usual rates between 2014 to 2017. Between 2015 and 2019 organized crime and gang-related homicides have emerged as accounting for a higher proportion of homicides than in previous years.

Sex offences started increasing in 2015, in large part due to the social discourse around sexual assault beginning in those years, as well as the efforts made by governments and NGOs to encourage reporting and support for victims. 2017 and 2018 saw particularly high but expected rate increases in Calgary, due to a review undertaken in Calgary alongside other law enforcement agencies across Canada in 2018. This review was in response changes made to unfounded sexual assaults in the Uniform Crime Reporting (UCR) Survey by Statistics Canada.

Assaults account for roughly 7 in 10 violent incidents, therefore a 31% increase over the five-year average in assaults heavily influences the overall violent crime rate in the city. Indicators of more serious degrees of confrontation are evidenced by increases in higher-severity of assaults outpacing common assaults. Domestic assaults make up half of all assaults and account for a significant part of the shift towards more violent assaults.

The presence of weapons in violent crimes shows increases across all weapon types, with firearms present up 1243 from the five-year average (N=393, AVG=176) and edged weapons increasing by 86% (N=871, AVG=468). While weapons presented in violent incidents does not mean that they were used, the statistic helps monitors degrees of severity in confrontation. A 20% increase in robberies, particularly of commercial premises highlights a trend towards increased severity of confrontation in recent years. Though relatively low in volume, there have also been noteworthy increases in incidents of discharging firearm with intent.

## Property Crime

Property crime increased 22% over the 5-year average in 2019, growing by rate year-over-year since 2015. Theft activities, including thefts of and from vehicles make up more than half of all property crime. Break and enters account for an additional 1 in 6.

After relative stability for several years, 2015 saw a significant increase in break and enter offences. In response to spike in activity in 2015 concerted efforts have been undertaken by the Calgary Police Service to mitigate break and enter activity. In 2016 significant reduction in residential break and enter offending was accomplished and maintained. The commercial B&E rate has, however, continued to climb each year since 2014 driven largely by opportunistic targeting of vulnerable locations such as underground parkades. As a result, the overall number of B&Es is 25% higher than the five-year average.

Vehicle theft has increased by 22% over the five-year average. In response to high vehicle crime rates an operational team was created in 2018 to focus on vehicle theft exclusively by identifying and acting on identified vehicle theft hotspots and offenders.

## Executive Summary

### Property Crime (con't)

A surge in liquor store thefts has driven up shoplifting rates. In response to this and other identified shoplifting trends, the CPS' Organized Retail Crime Unit initiated an online reporting process and training for businesses and loss prevention officers in 2019 with a goal of more effectively managing shoplifting response.

### Disorder

In addition to monitoring crime levels, the Calgary Police Service uses a range of incident types from publicly generated calls for service to monitor levels of "Social & Physical Disorder". The incident types selected for this disorder index are those which can have a negative impact on citizens' perceptions of safety, particularly in public places. Calls about suspicious persons, vehicles, unwanted guests and disturbances make up the largest portion of complaints received about disorderly behaviours. Between 2014 and 2015 disorder saw a rate increase of almost 7%, and a volume increase of 8,502 disorder calls for service, aligned with the economic downturn. Since that time, the number of disorder calls for service have remained relatively stable, resulting in rate decreases across the past three years.

## REPORT NOTES

Most of the statistical data in this report is derived from the Calgary Police Service records management system (SENTRY) and compiled by the Centralized Analysis Unit. Disorder data is derived from the Computer aided Dispatch (CAD) system.

Reporting is based on the most serious offence in the incident. Please note that offences are assigned to the month in which the offence was reported, which is not necessarily the month the offence occurred. The reported date is the first point in time at which the police were notified of the offence and reporting lag may vary due to circumstances (these are typically property crimes where the victim did not report the offence until a later date, or was unaware of the loss until a later date, or late-reported sexual assaults). Also note that “attempted” offences are included in these totals. Violent crime, excluding robbery, is counted by the number of victims, using the most serious offence against the victim. Robbery, and all other crime, is counted by incident using the most serious offence in the incident. Of note, cases are often cleared months and sometimes years later. Consequently, clearance rates for previous years may appear to be much higher than those of the present year. Cases “cleared by charge” and those “cleared otherwise” are included in these clearance rate totals.

For a more detailed explanation of the offence counting methodology, please contact the Centralized Analysis Unit.

<sup>1</sup> Violent crimes are counted at the victim level using the most serious violation against each victim in an incident. <sup>2</sup> Due to the dynamic nature of homicide investigations these numbers may have been updated manually to reflect the current homicide count. Due to manual updating, it's possible that 1 or more homicides may be reflected in the assault category. Homicide counts are provided by the homicide unit. <sup>3</sup> Robbery and all other crimes, as well as selected domestic non-criminal incidents, are counted at the incident level using the most serious offence in the incident. <sup>4</sup> Missing persons are counted by the number of missing individuals.

<sup>1</sup>Due to the dynamic nature of homicide investigations these numbers may have been updated manually to reflect the current homicide count. Due to manual updating, it's possible that 1 or more homicides may be reflected in the assault category. Homicide counts are provided by the homicide unit. <sup>2</sup>The range of average is calculated as 1 standard deviation above and 1 below the calculated average for the previous five year period.

<sup>1</sup>Violent crimes are counted at the victim level using the most serious violation against each victim in an incident. <sup>2</sup>Due to the dynamic nature of homicide investigations these numbers may have been updated manually to reflect the current homicide count. Due to manual updating, it's possible that 1 or more homicides may be reflected in the assault category. Homicide counts are provided by the homicide unit. <sup>3</sup>Robbery and all other crimes, as well as selected domestic non-criminal incidents, are counted at the incident level using the most serious offence in the incident. <sup>4</sup>A change made to the way in which bail violations and failures to appear/attend violations in 2017 makes the numbers for these categories non-comparable across the five-year period. <sup>5</sup>Missing persons are counted by the number of missing individuals.
