

Community Association Response

(via email)

November 25, 2021

The East Village Neighbourhood Association is in support of this Land Use Redesignation as it pertains to the specific EV606 development. The proposed building projections are justified given the unique site restraints but there are concerns that the corner projection at Riverfront Ave SE and Confluence Way may prevent established sightlines and be incongruent with surrounding building, which are set back from the streets at this corner.
