

We have received the plan for a future Re-designation of land use of above mention address.

We are strongly against this change due to many reasons.

- This will bring down the value of our houses/property.

We have paid a premium for having the houses on this lot as this house backed to a silent property with no future developments.

A view and location of the property is greatly responsible for a price of a house which we and our neighbours have paid changing that will effect us big time.

- This will disturb our privacy

We bought this house with privacy in mind from the rear of our house also for the View and Nature. Bringing a whole new community behind us will effect us and also our neighbours.

- This will be destroying only one area left in saddleridge which is green.

Putting more houses will take away the only one area left in saddleridge that is green/with a touch of nature.

We effected neighbours have discussed this and share a same view.

Please reconsider this as this will effect us greatly financially and emotionally as this will ruin our dreams for our Home and Future.

Thanks
