**Any changes to JUPA need to specifically focus on maintaining the green space that is provided on the school sites. School grounds are the largest contributors to community open space, and the green space MUST be maintained even if the building use changes. This is especially significant as the City looks to densify the established communities.**

**The FIRST priority for the building should always be a school. The City is adding massive density to established communities, and MUST maintain the schools to encourage families to stay in the area rather than move to the suburbs.**

**Redevelopment on the site should NEVER exceed the lot coverage of the existing building, and absolutely NO to developing these sites into mixed use residential. The sites should improve the quality of life for residents, not overwhelm the community with massive density.**

**Calgarians need to know what these changes mean and what impact they will have in their communities, especially with declining enrollment in a number of inner city schools. Don't decommission the schools when you are making sweeping changes to add density at the same time.**

**Thank you for your time.**
