

Applicant Outreach Summary

From April-October 2022, Maskwa Environmental Consulting Ltd. (Maskwa), on behalf of Future Energy Park Inc., undertook a comprehensive Participant Involvement Program (PIP) using various engagement activities to share information, collect feedback, and provide opportunities for individuals to ask questions about the Project.

The list of interested parties ranged from adjacent land owners, commercial tenants in nearby industrial and warehouse parks, government representatives including the City of Calgary and Rocky View County, and Indigenous Communities within Treaty 7.

Notification methods

Various notification methods have been used to disperse information to potentially interested parties regarding the Project and are listed below:

- Door Knocking: From May 17-20, 2022, door knocking was undertaken to buildings (commercial/residential) within 2,000 m of the Project site
- Site Signage: A "Proposed Land Use Change sign" (96"x48") was erected on the site
- Project website: <https://www.greenipi.com/portfolio/future-energy-park/> was developed. It remains available to any interested party and continues to be updated as the Project progresses
- Information Session: An online information session was held for interested parties via ZOOM on the 7th of June 2022.

Feedback Received

Feedback received to date from interested parties has focused predominantly on gaining a better understanding of the Project, its design, timelines, regulatory process, and construction activities. There were some concerns were about potential noise, odour, safety/emergency response, and traffic during and after construction.

It should be noted that most of the feedback received, was from vendors interested in proving goods and services for the project.

The potential noise, odour, safety/emergency response and traffic concerns received will be assessed during the development permit process when more detailed plans are available.

Summary of engagement Activities

Activity	Date	Description	Outcome
Notification packages mailed	May 6, 2022	Packages physically mailed out, including return mail title checks and resends.	368 packages
Door knocking	May 17-20, 2022	322 attempts were made within the 2,000 m Project notification area.	213 packages successfully delivered
Online information session	June 7, 2022	Online event through Zoom.	Seven (7) participants

Activity	Date	Description	Outcome
Notification packages mailed	September 15, 2022	Packages physically mailed out, including return mail title checks and resends.	326 packages
