Overview of Existing E-cigarette Legislation

In the absence of specific electronic cigarette or e-cigarette federal regulations, a variety of jurisdictions in North America have begun to adopt and look at ways to regulate the use of e-cigarettes.

Canadian context

In Canada, four municipalities are known to have bylaws regulating e-cigarette use. In addition, the City of Toronto has introduced a Council-voted policy to ban use in municipal work places, while the Winnipeg School Division introduced a policy to ban use on school properties. Further, in 2014 October the Nova Scotia House of Assembly tabled Bill 60 to propose amendments to the *Smoke-free Place Act* and *Tobacco Access Act* that include regulation of e-cigarettes.
