Subject: Re: Fwd: Stampede Pontiac Site / Cidex Developments

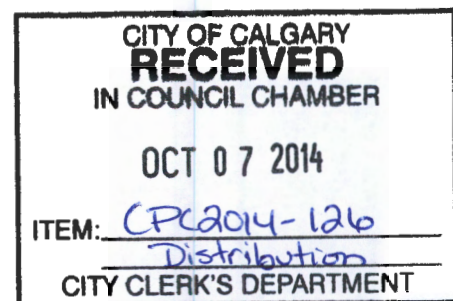

Bruce,

Thank you for the presentation to the interested board members (myself, Mona Jones, and Richard Beale) on August 1, 2014. We found your description of the proposed West Village Towers project to be very clear and thorough considering the stage of development.

While we understand there will be disruptions and that the view of some owners will be affected we thought the benefits of the project outweighed the disadvantages. We did not think there was any need for us, as a board, to intervene or make a complaint about the project. Of course individual owners can make their own decisions in this regard.

After the meeting we wrote a short description of the project in the minutes of our board meeting held August 12. Those minutes were available to all owners for review in September.

Thanks,
Bob Boyd
Secretary, Westmount Place Board of Directors
