SUN SHADOW STUDIES

FIG. 3.4 MARCH 21 & SEPTEMBER 21

AG.3.5 JUNE 21

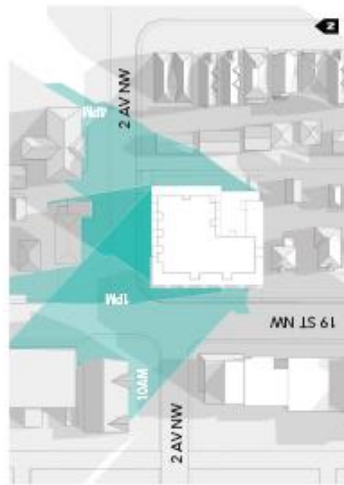

FIG. 3.6 DECEMBER 21

NOTE: Seasons, times of day and year have been selected to demonstrate impacts to buy/sell relationships.

ADDITIONAL NOTE: Set of studies, studies, and diagrams are available using industry standard modeling practices to help illustrate how the six moves across a grid state, and estimate the potential that the model has to be used for a proposed development upon the existing surrounding context. The use of such studies are conceptual in nature and represent an interpretation of the proposed architectural design, a scenario that is not intended to be a final design. The studies are based on established City of Calgary requirements. Some of these have been identified earlier and later in the paper based on the request of residents at the Information Session held on October 15, 2015. These studies are not intended to be a final design.
