## **Changes to Approved Performance Measure Trends**

During the preparation of proposed reduction packages, service owners were asked to identify if there are any anticipated changes to the performance measures trends approved in the One Calgary 2019-2022 Service Plans and Budgets that would result from the proposed reductions. This attachment provides a list of the performance measures with trend changes for Council approval (Table 1). From left to right, the columns in Table 1 list the service, performance measure, previously-approved 2018 result, the associated previously-approved performance measure trend, and the revised trend (indicated within the bordered column for Council approval). Performance measures anticipated to be significantly impacted are marked in bold type.<sup>1</sup>

Note that the trend of a certain performance measure may be impacted by multiple proposed reduction packages, and vice versa (i.e. more than one performance measure trend may be impacted by a reduction package). Each performance measure impacted by the proposed reductions is listed only once in Table 1 below.

Performance measures and their trends will continue to be monitored in 2019 with further updates on the trends to be reported at the 2019 Year-End Accountability Report. Any further changes in performance measure trends will be flagged for Council approval in November 2019 as part of the standard adjustments process.

<sup>&</sup>lt;sup>1</sup>Nine of 260 performance measures approved in the 2019-2022 Service Plans and Budgets were identified as having a significant impact; however, two of these nine are not listed in Table 1 for Council approval because the trend is not anticipated to change since both will continue on a downward trend. These measures are from the IT Solutions & Support service (Overall Satisfaction with IT – 2018 result was 90 with approved and anticipated trend being downward) and Parks & Open Spaces service (Naturalization – 2018 result was 2 with approved and anticipated trend being downward).
