## Corporate Project Management Policy, Practices and Standards

This attachment provides an overview of the **policy, practices and standards** that have been developed as part of the **Corporate Project Management Framework** program.

The policy, practices and standards together form the foundation of what is required from a project management perspective at The City of Calgary.
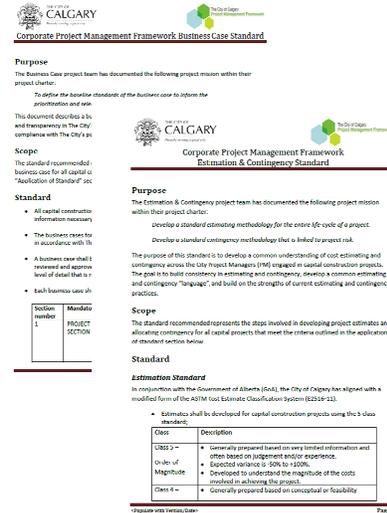

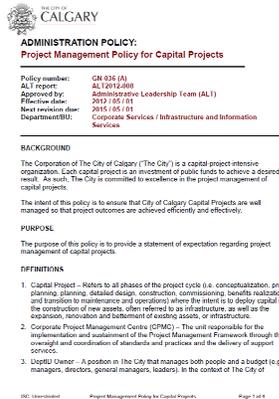

Administration Policy

The City of Calgary Project Management Practices

Standards

Administration Policy establishes the corporate direction as approved by the Administrative Leadership Team (ALT). The policy directly references The City of Calgary Project Management Practices.

The City of Calgary Project Management Practices provide a general overview of project management at The City of Calgary.

Standards provide additional definition and direction on specific topics referenced in the Project Management Practices where additional detail is deemed necessary to ensure consistency and good practice.

Specific standards have been created and implemented in the areas of:
- Project Business Case
- Project Charter
- Project Plan
- Project Progress Reporting
- Project Records and Information Management

Corporate Project Management Policy, Practices and Standards

- Project Estimating and Contingency
- Project Change Control
- Project Management Quality Assurance
- Project Governance and Team Roles and Responsibilities
- Project Risk Management
