Bylaws, Regulations, Council Policies

The off-site levies and the off-site levy bylaw are governed by the Municipal Government Act (MGA), and the Off-Site Levies Regulation (Alta Reg 187/2017), as amended by The City of Calgary Charter, 2018 Regulation (Alta Reg 40/2018). The bylaw allows the cost of infrastructure for growth to be shared between The City and developers, providing for financial certainty and reduced risk to the development industry. The MGA also requires the publication of annual reports that provide full and open disclosure of all off-site levy payments received and used, with details on the type of infrastructure and costs within each benefitting area.

The levies collected are used to pay for all or part of the capital cost of new or expanded infrastructure and facilities such as: water/wastewater, treatment/pipes, storm water infrastructure, major interchanges/expressways, fire stations, recreation facilities and libraries. The levy fund is also used to pay required land and associated interest costs to finance the capital projects. These growth-related capital infrastructure investments are guided by policies of the Municipal Development Plan and Calgary Transportation Plan.

Off-site Levy Bylaw (2M2016)

The Off-site Levy Bylaw authorizes The City to place charges on development to fund growth-related capital infrastructure.

Centre City Bylaw (38M2009)

The Centre City levy supports growth, quality of life and resiliency in the Centre City Plan Area. The levy consists of two components:

1. The utility portion through the Centre City Levy Bylaw (Bylaw 38M2009).
2. The voluntary community services portion under Council resolution (as per report LPT2010-03).

Municipal Development Plan (24P2009)

In accordance with the Municipal Government Act, the Plan provides the long-term strategic framework for growth and development in the city of Calgary and addresses future land use, development and transportation, relationships with municipal neighbours, provision of municipal services and facilities, and the type and location of land uses adjacent to sour gas facilities.

Calgary Transportation Plan and Policies (TP012)

The policy defines future transportation needs and guides orderly growth of Calgary's road and transit networks in a healthy, safe, mobile, and cost-effective manner.
