## Community Outreach for Planning & Development Applicant-led Outreach Summary

### **What did you hear?**

Provide a summary of main issues and ideas that were raised by participants in your outreach.

Some of the concerns that were received by the file manager were:

Already enough R-CG in the area.

Concerns over sewer and water

Concerns over existing trees and vegetation.

No direct responses received by our office.

### **How did stakeholder input influence decisions?**

Provide a summary of how the issues and ideas summarized above influenced project decisions. If they did not, provide a response for why.

The area and lots surrounding this lot is all much higher density as outlined in the Banff Trail ARP. The R-CG designation would be a good buffer between higher density to lower density.

Lot landscaping and utility issues are dealt with at development permit stage and not usually at lot redesignation.

### **How did you close the loop with stakeholders?**

Provide a summary of how you shared outreach outcomes and final project decisions with the stakeholders that participated in your outreach. (Please include any reports or supplementary materials as attachments)

We did not receive any direct responses.
