

Drought Resilience Plan

CD2023-0756

October 2, 2023

Previous Council Direction

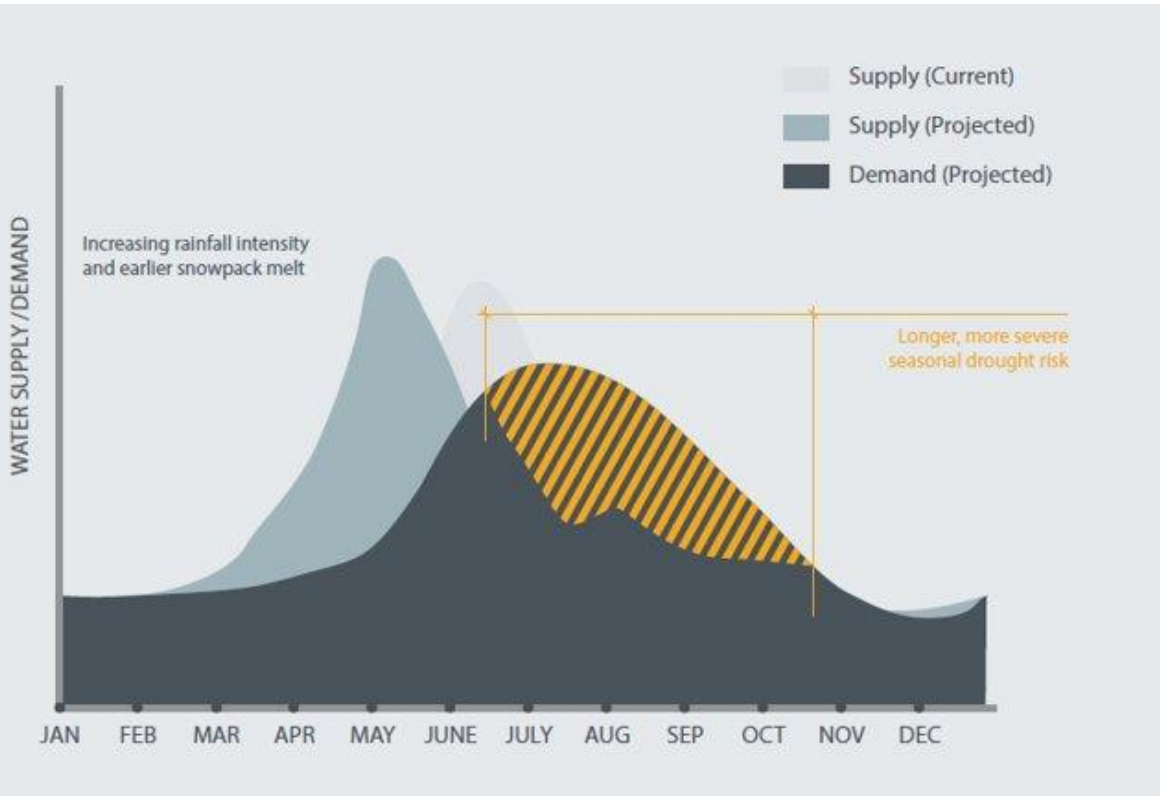

Recommendations

The Community Development Committee recommend that Council:

1. Approve the Drought Resilience Plan.
2. Advance priority water demand strategies from the Drought Resilience Plan in the 2023-2026 business cycle.
3. Continue to advocate for advancing the evaluation of a new upstream Bow River Reservoir as an integrated water management tool to support drought and flood resilience.

Drought is a top climate hazard in Calgary

Building drought resilience through a collaborative and comprehensive approach

Drought Resilience Plan

Demand and Supply Management

GOAL A - Reduced Demand

New water efficiency targets and programs

GOAL B - Protected Water Supply

Upstream Bow River Reservoir remains key for integrated water management

Recommendations

The Community Development Committee recommend that Council:

1. Approve the Drought Resilience Plan.
2. Advance priority water demand strategies from the Drought Resilience Plan in the 2023-2026 business cycle.
3. Continue to advocate for advancing the evaluation of a new upstream Bow River Reservoir as an integrated water management tool to support drought and flood resilience.
