

# Background and Previous Council Direction

## Background

Water Lines of Service encompass a range of essential water services dedicated to maintaining a sustainable and thriving community. These services include Stormwater Management, which ensures efficient drainage and prevents flooding in urban areas, safeguarding both infrastructure and residents. Wastewater Collection and Treatment ensure the safe removal and treatment of wastewater to protect public health and preserve water resources. Lastly, Water Treatment & Supply ensures a clean and reliable water supply, essential for meeting the needs of a growing population while conserving this precious resource. Together, these services play a critical role in promoting clean and reliable supply of water for all.
