Subject: Re: SB2021-0340-Circulation Package

Oh OK we already knew that that was the long-term plan in order to prepare for the widening of 144th Ave. to go up over the ridge and into Evanston.

My boards only concern was if they were taking away from the natural ravine and putting houses or a strip mall in there; but since that's not the case we would have no objection to improving the infrastructure around here.

The only question I have there is a cycle path which runs along the west side of that ravine from 37 street but end suddenly behind the houses and I feel like it should tie in or link up to Symons valley road or 144 somehow. We would like to request that whichever developer is responsible for that cycle path tie and that it be completed or included with the intersection improvement plans.

Thank you
