Psychometric Tools

The backbone of the LeaderFitTM method consists of three Hogan psychometric instruments that measure leadership style and potential and our proprietary *Looking Glass* questionnaire

Hogan Personality Inventory (HPI) is a measure of normal, or bright-side personality – qualities that describe how we relate to others when we are at our best

Hogan Development Survey (HDS) describes the dark-side tendencies that emerge in times of increased strain and can disrupt relationships, damage reputations, or derail people's leadership

Motives and Values Inventory (MVPI) describes personality from the inside – the core goals, values, drivers, and interests that determine what we desire and the culture that leaders will create

Strengths (HPI)

Behavioral styles and aptitudes that align with job requirements

Ξ

Behaviors that can help you succeed

Core Values (MVPI)

Performance drivers and motivators

What you wan

Derailers (HDS)

Overuse of behaviors that lead to derailment

E

Behaviors that can get in your way

Executive
Performance
and
Potential
