MUNICIPAL NAMING, SPONSORSHIP AND NAMING RIGHTS POLICY

Background:

The City of Calgary has policies that govern the naming of assets such as roadways, parks and communities. Currently there are three policies that relate to various naming opportunities and Council has directed these policies all be integrated into one Municipal Naming Policy. The policies are; Municipal Naming Policy (CS003), Sponsorship Policy City-Owned, City Managed Assets (CS011), and Naming Rights Guidelines – City Owned, Civic Partner-Operated Facilities (CSPS012).

Consolidation Process

Multiple internal and external stakeholder groups and individuals were consulted during the review and consolidation process. These groups include the Municipal Naming Committee, asset stewards, Civic Partners and their City liaisons as well as Developers.

The following is a high level overview of the changes made to date through the consolidation of the policies:

- The existing policies were condensed into one omnibus Municipal Naming & Sponsorship Policy.
- The new Policy and its associated schedules were created for each of the impacted naming areas including the naming of Municipally Owned Assets, Communities and Roadways, and Sponsorship and Naming Rights;
- Background, anecdotal, and redundant information along with operational processes were removed from the policy reducing overall content from 64 pages to 27 pages.

Policy

- Policy background and purpose statements were created to reflect the new omnibus policy's intent.
- Definitions were established including partner, sponsorship, community, neighbourhood, asset steward, and policy steward.
- Infrastructure & Information Services (IIS) was assigned as policy steward for the Municipal Naming & Sponsorship Policy.
- A consistent procedure for Municipal Naming and Sponsorship was defined including Council approval committees:
 - o Priorities and Finance (PFC) Committee reviews Municipal Asset naming, and
 - o Calgary Planning Commission (CPC) reviews Community and Roadway naming
- Requirements and responsibilities were made consistent throughout the document.
- It was determined that Community and Roadway naming would be reviewed by the CPC and all other naming being reviewed by the PFC.

Section 1: Naming of Municipally Owned Assets

- Material was consolidated from the existing Municipal Naming Policy (CS003)
- Duties previously managed by the Municipal Names Committee were assigned to the policy steward and asset steward and the Municipal Names Committee removed.
- Requirements for the identification of asset names, listing of approved and/or proposed names, and naming of Municipal assets were established.

Summary of Changes

 Additional criteria was added to allow for greater options when naming municipal assets including naming after former elected representatives, notable Calgarians, internationally recognized individuals and organizations for contributions to humanity and business.

Section 2: Naming of Communities and Roadways

- Material was consolidated from the existing Municipal Naming Policy (CS003)
- Duties previously managed by the Municipal Names Committee were assigned to the policy steward, Planning, Development & Assessment (PDA), and Transportation.
- The requirements affecting communities were expanded to include the naming of neighbourhoods.
- Specific naming criteria for communities was removed, allowing for developers to name communities based on citizen feedback.
- Clause stating "The area should reflect Calgary's heritage and/or further a sense of community" was added.
- Based on feedback received from the Urban Development Institute (UDI), a clause was added
 in section 2.2.2.3 to allow the addition of street types at the discretion of the "approving
 authority" to be determined by Administration.
- Determination that the General Manager of PDA is responsible to provide recommendation to CPC regarding new community, neighbourhood and roadway names and includes process responsibility for circulating naming to various stakeholders (ex. Fire, Roads, addressing etc.).

Section 3: Sponsorship and Naming Rights

- Material was consolidated from the existing Municipal Naming Policy (CS003), Sponsorship Policy City-Owned, City Managed Assets (CS011), and Naming Rights Guidelines – City Owned, Civic Partner-Operated Facilities (CSPS012)
- Duties previously managed by the Municipal Naming Committee and Customer Service & Communication (CSC) were assigned to the policy Steward and asset Steward.
- Sponsorship and Naming Rights were consolidated under one schedule with common authorization levels and thresholds applied (exact funding thresholds/authorization levels to be discussed at the Administration Leadership Team).
- This schedule covers the sponsorship of Municipally Owned and Operated Assets, Municipally Owned and Civic Partner Operated, and an overview of The City's role in Civic Partner Owned and Operated facilities.
- Better differentiation and separation between sponsorship and naming rights.
- Content updated to reflect current processes and was focused on bringing clarity to sponsorship requirements.
- Information that was informative about the practices of Civic Partners was removed.
- In response to the Notice of Motion (City Owned, Partner Operated Facilities), the process in which Naming Right Sponsorship is solicited was reviewed.
- Replaced "Civic Partner" throughout the policy with "Partner. As a result, the more generic terms
 expands the policy to ensure that all General Managers receive Council approval for the sale of
 naming rights of any City owned, Partner operated asset.
- Clarification of the accountability and responsibilities of City employees regarding the sale of naming rights for Partners.
- Confirmation that Council is the approving authority for naming of Partner assets.

Summary of Changes

Implications of the proposed policy changes:

- Responsibility of naming passed to asset and policy stewards from Municipal Naming Committee (which has been disbanded).
- Business Units to circulate naming internally to ensure uniqueness and way finding, with assistance from IIS.
- Responsibility of coordinating naming reports for communities and associated roadways
 assigned to PDA from Municipal Naming Committee. Support will be provided by IIS in terms of
 the compliance of proposed naming with policy criteria. Council approves all community and
 roadway naming with recommendation from CPC.
- Roads has been identified as approving street types and streamlining process with developers and PDA.
- Roads recommending road names for ad hoc naming but PDA should circulate them on community naming for information.
- Affected General Managers (GM) are responsible for coordination of the naming report to PFC with support from IIS on valuation as required and research on request and to maintain list of agreements.
- Manager, Directors and GM's will need to understand their requirements for signing off and reporting sponsorship agreements.
- GM's may consider the need for additional resourcing to support the sale of naming rights by providing resourcing for asset valuation and/or oversight of Partner asset valuation activities.
- The change from "Civic Partner" to "Partner" means that all GM's are now required to follow the policy where a third party partner, including a Private Public Partnership (P3) or otherwise, operates a facility and wishes to name it after their company.
- Council will have authority for naming all City and Partner operated assets.

Summary of Changes
