Site Selection Criteria

- B.2. *Child care services in low density residential area* should be located in relationship to activity focus areas such as schools, community centres, recreation facilities, parks and local commercial areas. These locations provide for natural hubs for communities and already experience higher levels of traffic and activity.
- B.3. *Child care services* should be located on a site that can provide sufficient staff parking and pick-up and drop-off parking. The site should not front a bus zone, or a location planned for a bus zone in the future, as this may impair pick-up and drop-off parking.
- B.4. *Child care services* must be located on sites large enough to accommodate outdoor play areas for the type of child care being proposed. The Province sets these standards via the *Child Care Licensing Act*.
- B.5. *Child care services* should be located on collector streets, which already carry higher levels of traffic than local streets. Locations near collector and major streets may also be considered provided access to the facility does not draw traffic through the community.
- B.6. *Child care services* should be located on corner parcels to minimize impact on adjoining residential uses. Corner parcels are also ideal for providing dual-frontages for the provision of pick-up and drop-off access.
- B.7. While corner parcels are preferred, non-corner parcels may be appropriate where the *child care service* is: on a parcel sharing a side property line with a lane; on a parcel with significant frontage and parcel area; or on a parcel located on the same block as other community services. Consideration should be given to the separation of the child care service from other nearby residential buildings; the locations of proposed play areas relative to the amenity space of adjoining properties; and the amount of frontage or on-site area to accommodate pick-up and drop-off parking. Each site should be evaluated on its own merits, and the proposed intensity of the *child care service* and its potential impact on adjoining properties should be the primary considerations.
- B.8. Concentration of *child care services* in an area should be avoided. Any cumulative impacts of this use on the character of the area should be considered in evaluating the application. Considerations should include whether there is more than one *child care service* on the same block, or whether a residential property will be unduly impacted due to more than one *home-based child care* or *child care service* in close proximity.
