RE: The proposed land use redesignation

At this time we do not have any feedback or comments. I had a chat with the developer last week and the wider committee is meeting with the developer tomorrow. If there are any comments that arise from that session I will make sure to forward them to you.

Most of the comments and feedback I've heard from the community pertain to the development permit and not the land use redesignation, and as such I have directed them to submit those comments during the development permit application review.

We will likely abstain from submitting a letter with regards to this application, but do not oppose the proposed land use redesignation.
