Location Criteria for Multi-Residential Infill (as adopted 2014 March)

In order to assist in the evaluation of land use amendment applications and any associated local area plan amendments, the following criteria shall be applied and reported on in Administration reports to Calgary Planning Commission. These criteria are not meant to be applied in an absolute sense to determine whether or not a site should be recommended for approval. In general, the more criteria an application can meet, the more appropriate the site is considered for multi-dwelling infill development (all other things being considered equal). The following table represents a proposed checklist for preferred conditions to support land use amendments in low density residential areas. It is to be used in the review and evaluation of land use amendment applications for the following districts or direct control districts based on the following districts:

Multi-residential – Contextual Grade-Oriented (M-CG) District Multi-residential – Contextual Low Profile (M-C1) District Multi-residential – Contextual Medium Profile (M-C2) District

Subject Site	Comments
On a Corner	Corner developments have fewer direct interfaces with
	low density development.
	Corner sites avoid mid-block development that could
	signal speculation that the entire block is appropriate for
	redevelopment.
Within 400m of a transit stop	Allows for greater transit use, providing more mobility
	options for residents of multi-dwelling developments.
	Can reduce motor vehicle usage, thereby minimizing
W	vehicle traffic impact on community.
Within 600m of a Primary Transit stop	Allows for greater transit use, providing more mobility
or station	options for residents of multi-dwelling developments.
	Can reduce motor vehicle usage, thereby minimizing
	vehicle traffic impact on community.
On a collector or higher standard	Minimizes traffic on local streets
roadway on at least one frontage	
Adjacent to existing or planned non-	Creates an appropriate transition between low density
residential development or multi-	and other more intensive land uses or larger scale
dwelling development	buildings
Adjacent to or across from existing or	Creates an appropriate transition between low density
planned open space or park or	and other land uses
community centre	
Along or in close proximity to a corridor	Creates an appropriate transition between low density
or activity centre	and other land uses
Direct lane access	Improves pedestrian environment for local residents by
	limiting the creation of multiple or high frequency use
	driveways across local sidewalks.
