

Background and Previous Council Direction

This attachment provides a summary of the background and previous Council direction related to the proposed Growth Application considered in this report, as well as new community growth decision-making in general.

Background

2024 May represents the first time that new community Growth Applications are being brought forward in alignment with the redesigned system approved by Council in 2023 July ([IP2023-0559](#)). The redesigned approach adopts a more responsive application-based model, driven by improved growth information awareness and more empirical evaluation criteria. An applicant can apply at any time, but final decisions will be made through the annual Service Plans and Budgets process.

Between the implementation date of the redesigned system (2023 August 1) and this report, nine new Growth Applications have been submitted. Many of these were resubmissions of business cases reviewed in 2022. Additionally, there are two active business cases in the Belvedere area that are still under review from 2022.
