

Community Association Response

WINDSOR PARK DEVELOPMENT COMMITTEE

November 13, 2023

Re: LOC2023-0251

The Windsor Park Development Committee has been vocal in its preference for intensification to be focused on Neighbourhood Main Streets and Activity Areas and less on the core of the community. Overall this redesignation on 50th Ave is aligned with Windsor Park Development Committee's preference.

However, we would like to raise one concern that is related to garbage bins. We can't see how the storage of waste and recycling bins that would be required for a development of this scale would fit within the area available. Furthermore, on pickup day there is insufficient space for the bins to be placed in the lane for city loading. Where would they go other than in front of the garage doors or in front of the neighbour's lane access. That is unacceptable.

Thank you for considering our input.

Ken Young

Windsor Park Development Committee
