Dear Mayor Gondek, Reeve Kissel, city and county councillors, and city and county administrators:

RE: Prairie Gateway Area Structure Plan

On behalf of Canadian Pacific Kansas City ("CPKC"), I am writing to express support for the Prairie Gateway Area Structure Plan ("ASP"). The Prairie Gateway ASP is advantageously located next to CPKC's mainline, providing access to dependable, safe, and efficient freight transportation. We have listed the Shepard Logistics Park development located inside the Prairie Gateway ASP on our business development website.

Dependable

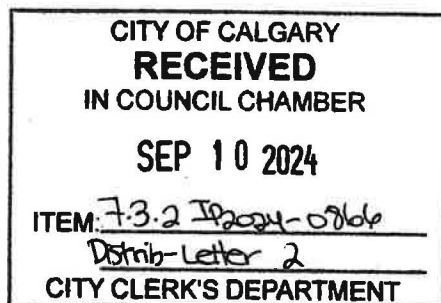

With the largest geographic reach and industry-leading operational expertise, CPKC offers end-to-end transportation logistics solutions for shippers. Our unparalleled network spans Western Canada to the south of Mexico. Our single-line service offering delivers faster transit times, improved service, and competitive market access. CPKC's Class 1 interchanges, short line connections and transload service and network solutions extend our reach and help our customers to win in their markets.

Safety

Operating safely is fundamental to who we are. In 2023, CPKC led the industry with the lowest Federal Railroad Administration-reportable train accident frequency among Class 1 railroads, building on Canadian Pacific's legacy of 17 consecutive years of industry leadership. CPKC is committed to safeguarding our people, our communities, the environment, and our customers' goods.

Efficiency

The freight rail industry has a vital role to play in the transition to a lower carbon future. Freight rail is the most environmentally sustainable mode of surface transportation, with one intermodal train carrying the capacity of more than 300 transport trucks. Our goal is to be a leader in this transition.

CPKC looks forward to updates from the city and county as you each advance your consideration of the Prairie Gateway ASP. Should you have questions about our operation, please contact me at mike.lovecchio@cpkcr.com or 778 772-9636.

Sincerely,

Mike LoVecchio
Director Indigenous Relations and Government Affairs
Canadian Pacific Kansas City
